Morning,

After reviewing the report I have no objections to the tree in question being felled, it is not protected by any TPOs. However the tree is located in a conservation area, so inline with the conservation and biodiversity improvement guidelines we need to insist that at least 2 trees are planted as a replacement. Silver Birch (*Betula pendula*), field Maple (*Acer campestre*) or Rowan (*Sorbus aucuparia*). Would be acceptable species.

This will adhere to biodiversity enhancement and preserve the historical vegetation cover in this location.

Thanks
Andrew
