

BIRD BOX DETAILS

This document details the requirement for 4 no. bird boxes to be located on the YMCA site, as a result of planning condition no. 7 related to the planning consent, reference P/20/0219.

A typical image of a bird box to be installed on site. The proposal is to attach the 4 no. bird boxes to the existing trees that are being retained on site (see below the site plan indicating the position of the trees).

The intention is not to attach the boxes to the existing building because they would interfere with scaffolding and any future alterations to the building fabric.

Plan not to scale
