- Water Pumping Station
- Existing main
- Non-operational main
- Raw Water

NB: Water main symbol colour indicates the type.

LIGHT BLUE	- Trunk
DARK BLUE	- Distribution
YELLOW	- Raw Water

Note

Whilst every reasonable effort has been taken to correctly record the pipe material of DCWW assets, there is a possibility that in some cases pipe material (other than Asbestos Cement or Pitch Fibre) may be found to be asbestos cement (AC) or Pitch Fibre (PF). It is therefore advisable that the possible presence of AC or PF pipes be anticipated and considered as part of any risk assessment prior to excavation.

Dear Sirs/Cousin(s): The Company gives the information as to the position of its underground apparatus, by way of general guidance and on the understanding that it is based on the best information available, and no warranty as to its correctness is relied upon in the event of excavations or other work made in the vicinity of the company's apparatus. The Company is not responsible for any damage to its apparatus or to any other property caused by the work performed by the Company, in so far as it is done in accordance with statutory requirements of sections 195 and 199 of the Water Industry Act 1991 which is based upon the best information available, and, in particular, but without prejudice to the generality of the foregoing, the Company is not responsible for any damage to its apparatus or to any other property caused by the Company, service pipe, service lateral, drain or manhole and any associated apparatus laid before 1st September 1991. If there is any damage to the Company's apparatus or to any other property caused by the work performed by the Company, the information is entirely without prejudice to the provisions of the New Roads and Street Works Act 1991 and the Company's right to be compensated for any damage to its apparatus.

Service pipes are not generally shown but their presence should be anticipated.

**EXACT LOCATIONS OF ALL APPARATUS
TO BE DETERMINED ON SITE.**
