Front Elevation Façade Finishes

Introduction:

This document has been created to describe the proposed façade finishes to the front elevation at Prince Charles Hospital, Merthyr and support the discharge of condition 2 for approval P/15/0114.

The related extensions in this document are part of the approved planning application P/17/0286 included to show we are creating unity across the front elevation by using materials which have already been utilized when the ECC building was built.

A

Colour: Anthracite
(RAL7016)
Steelwork

B

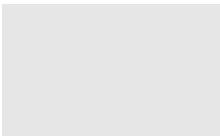

Granite Rainscreen
Cladding
