22/12/2020

Annwyl Syr/Madam / Dear Sir/Madam,

BWRIAD / PROPOSAL: CREATION OF FOOTPATH AT LAND ADJACENT TO AFON TAF HIGH SCHOOL YEW STREET TROEDYRHIW

LLEOLIAD / LOCATION: LAND ADJACENT TO AFON TAF HIGH SCHOOL YEW STREET TROEDYRHIW

Thank you for consulting Cyfoeth Naturiol Cymru / Natural Resources Wales about the above, which we received on 14/12/2020.

We have no objection to the proposed development as submitted and provide the following advice.

Flood Risk

Our Flood Risk Map confirms the application site lies entirely within Zone C2 of the Development Advice Maps (DAM) as contained in TAN15.

Given the nature of the proposed development (and in the absence of a flood consequences assessment) we consider the proposals could be acceptable, subject to the developer being made aware of the potential flood risks and advised to install flood-proofing measures as part of the development.

Other Matters

Our comments above only relate specifically to matters included on our checklist, *Development Planning Advisory Service: Consultation Topics* (September 2018), which is published on our [website](#). We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests.

We advise the applicant that, in addition to planning permission, it is their responsibility to ensure they secure all other permits/consents/licences relevant to their development. Please refer to our [website](#) for further details.

Advice for the Developer

Flood Risk Activity Permit

Please advise the Applicant that the Environmental Permitting Regulations (2016) require them to obtain a bespoke Flood Risk Activity Permit for any works or structures located in, under, over or within 8 metres of the bank top of the River Taff, a designated "main river". Further advice and guidance is available on our website at:

<http://www.naturalresources.wales/permits-and-permissions/flood-risk-activities/flood-risk-activity-permits-information/?lang=en>

Works Near a Watercourse

During the construction phase you should take any precaution to prevent contamination of surface water drains and local watercourses. Oils and chemicals should be stored in bunded areas and spill kits should be readily available in case of accidental spillages.

For further guidance please refer to GPP 5 and PPG 6 at the following link:

<http://www.netregs.org.uk/environmental-topics/pollution-prevention-guidelines-ppgs-and-replacement-series/guidance-for-pollution-prevention-gpps-full-list/>

Land Contamination

According to our records the proposed development site is located near to land that is, or has been, used for the deposition of waste material. We would therefore advise you to consult with the local authority's Environmental Health and Building Control Departments, as they may hold detailed records, and may wish to make appropriate recommendations in respect of landfill gas investigation/remedial work.

If you have any queries on the above, please do not hesitate to contact us.

Yn gywir / Yours faithfully

Charlotte Morgan
