

KEY

-  Significant trees to be retained (approximate position)
-  Woodland/shrubs to be retained (approximate extent)
-  Proposed native standard and feathered tree planting
-  Trees proposed as part of earlier application
-  Proposed native tree and shrub mass planting
-  Native tree and shrub mass planting proposed as part of earlier application
-  Existing retained building
-  Proposed building
-  Building proposed as part of earlier application
-  Red line boundary (approximate)
-  Estimated tree and large shrub cover after proposed works have been completed

NOTES ON TREE COVER

The tree cover shown by the light green hatching is an estimate of the overall spread of *existing* trees and large shrubs that will be retained after the proposed works are complete. It does not include proposed planting; this is shown as beds enclosed by a mid-green line and by individual mid-green circles (see key above).

Once proposed planting and areas left to regenerate are established, the overall tree cover will be significantly greater than the areas of light green hatching shown at present.
