PROFILE

Air-serv are the market leaders in the supply of ancillary forecourt equipment.

Across the United Kingdom and Ireland we offer our customers Air, Vacuum, Fragrance and Jet washes with outright purchase, rental and our unique revenue share options. AIR-serv specialises in revenue generating equipment for the forecourt industry. We manufacture, install and maintain all of our own equipment.

With over 27 years of experience AIR-serv assures you of the highest quality service from site surveys to equipment support and maintenance.

All our machines are available for outright purchase or as a rental unit. You could also be a part of our unique revenue share programme. Maximize your forecourt's earning potential by joining us.

REVENUE SHARE PROGRAMME

Our unique revenue share programme provides you with the opportunity of installing and maintaining our equipment including chemicals with no capital costs to you.

- With our unique programme you share the revenue, remove the costs and increase your profits.
- Our efficient service team and advanced tracking technology enables our engineers to have unrivalled breakdown response times that ensures your machine is maintained to the highest standards in the industry.

TYRE INFLATION

Our Air service puts you in complete control of the machines with easy to use operation.

Committed to promoting tyre safety AIR-serv is a member of Tyre Safe, UK's leading tyre safety organisation. Our customers benefit from the company's accurate and highly reliable air service.

- Our air machines have the very latest digital technology, which ensures that you get the highest quality air service.
- Our rental and revenue share machines are regularly serviced and calibration verified
- Air-serv digital tyre inflators are available with different build specifications to suit customer requirements.
- Complete Care Air & Water, Air & Screen wash and Air Only.
- All our tyre inflators are fitted with frost protection heating and insulation packs.
- We also provide our customers with an option to brand the tyre inflator with Eco Care livery to make their sites eco friendly and raise their tyre safety profile.

VACUUMING

Powerful buy time Vacuums and Vac & Fresh puts you in complete control with a personal touch.

- Our customers benefit from the highly effective powerful suction for excellent dirt removal on all interior surfaces and lightweight long reaching hoses for convenience and ease of use.
- Our vacuums are easy to use where you get to decide which areas need a little more attention giving the powerful vacuum your personal touch.
- All our vacuums offer a powerful 1700 watts vacuums motor with environmental noise levels.
- Our powerful vacuums are available with three different build specifications to suit your requirements.
- Complete Clean Vacuum, Vac & Fresh and Air Vac & Fresh.
(Air Vac & Fresh currently only available in Ireland & Europe).
- With our vacuums delivering powerful suction and ready to use environmentally friendly fragrance to give your vehicle long lasting freshness, we can assure you of getting the highest quality vacuum service.

Colours available

Safe Tyres Save Lives

Incorrect tyre pressures affect your cars handling and grip, potentially causing dangerous irregular or unpredictable vehicle behavior. Incorrectly inflated tyres are also much more likely to suffer from a dangerous blowout.

By keeping your tyres at their optimum pressure running costs are also reduced. Under-inflated tyres require a bigger force to make them turn so your car uses more fuel. Additionally tyres which are not set to their correct pressure wear out more quickly.

Correct Tyre Pressures Are Vital For Safety On The Road

Using AIR-serv's air service puts you in complete control with easy to use operation our customers benefit from a highly reliable air service.

You can be confident that you are getting the highest quality air service because our air machines have the very latest digital technology to provide an accurate and reliable service and are regularly serviced and calibration verified.

Correctly Inflated Tyres

- 👍 A Higher Degree Of Safety
- 👍 Up To 25% Longer Tyre Life
- 👍 Lower Fuel Consumption
- 👍 Less CO2 Emissions

(DEPENDANT UPON DRIVING STYLES AND ROAD CONDITIONS)
