Notes:

Whilst every reasonable effort has been taken to correctly record the pipe material of DCWW assets, there is a possibility that in some cases pipe material (other than Asbestos Cement or Pitch Fibre) may be found to be asbestos cement (AC) or Pitch Fibre (PF). It is therefore advisable that the possible presence of AC or PF pipes be anticipated and considered as part of any risk assessment prior to excavation.

Dŵr Cymru Cylinddydd (the Company) gives this information as to the position of its underground apparatus by way of general guidance only and on the understanding that it is based on the best information available and is not warranted as to its correctness in the event of excavations or other works made in the vicinity of the company's apparatus. The error of location of apparatus is liable to vary and any excavations made entirely on your own. The information which is supplied by the Company is done so in accordance with statutory requirements of sections 103 and 109 of the Water Industry Act 1991 which is based upon the best information available and, in particular, but without prejudice to the generality of the foregoing, it should be noted that the records that are available to the Company may not disclose the existence of water mains, storm pipes, sewers, lateral drains or disposal mains and any associated apparatus (all buried). In September 1998, or if that is, the period of time following that period of time, it may be necessary to consult the records of the Company. The Company's liability is limited to the provision of the New Roads and Street Works Act 1991 and the Company's liability is limited to the provision of the New Roads and Street Works Act 1991 and the Company's liability is limited to the provision of the New Roads and Street Works Act 1991.

Service pipes are not generally shown but their presence should be anticipated.
