

Planting Specification

Shrub and Herbaceous Mix for rain gardens and ornamental planting areas

40% 2L pots planted at a density of 5 per m²
30% 3L pots planted at a density of 4 per m²
30% 5L pots planted at a density of 3 per m²

Tree Planting

All trees to be supplied at 14–16 cm girth, container-grown or root-balled as appropriate. To be planted with watering pipes, double staked with Hessian tree wires.

Planting areas are to be prepared in accordance with the landscape specification, ensuring soil is cultivated, weed-free, and suitable for planting. Final species type and specification to be confirmed by the Landscape Architect prior to planting.

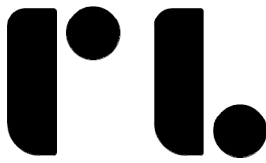

KEY

- Red line site boundary
- Blue line land ownership boundary
- Existing trees and vegetation to be retained
- Existing vegetation to be removed
- Existing grass to be retained
- Proposed trees
- Ornamental planting
- Rain garden planting
