DOORS AND WINDOWS

The Origin Door Range

Introducing the Origin Door...

The Origin Home is a collection of the finest quality products, designed and manufactured in Great Britain, by Origin.

A fundamental part of this is the Origin Door range, which is a beautifully crafted and expertly executed collection of doors that are made from premium grade aluminium.

Offering two sightline options (either 49mm or 72mm), the Origin Door is available as a bi-fold, a corner bi-fold, a traditional French door or as a single door; meaning there's a door option for you, no matter your renovation.

In addition to being visually stunning, Origin Doors are completely bespoke, so you can tailor them to your stylistic and practical needs.

Visually stunning,
ultra-secure and completely
tailored to your home...

Complementing any property – whether it be a new or existing build, an extension, or even a period style cottage – the Origin Door range is guaranteed to change the way a home is interacted with, enabling it to be enjoyed like never before, wherever you may be.

To some, a door is merely an entranceway to access a new area or room. But for Origin and tens of thousands of homes internationally, it's so much more. It's a transformation not only to the aesthetics of a home, but to a way of life; a lifestyle that unites surroundings and families alike.

The Origin Door Range holds the key to longer summer days, warmer winter evenings and an all year round uninterrupted widescreen view of your world.

The OB-49...

The OB-49 is our slimline door system that has been re-engineered from the industry-renowned OB-72. Its sightline of just 49mm means less profile and more glass is achieved, giving you a panoramic view of your surroundings.

Manufactured from premium grade aluminium, it offers impressive panel sizes without compromising on security, thermal or operational performance - it's the ultimate combination.

The OB-72...

The OB-72 is the door system that started it all for us. Born after our owners found they could not get great aluminium folding sliding doors for their building projects, their ambitious solution was to create a company capable of manufacturing the UK's best quality doors, that's backed by uncompromising levels of service.

The result was the OB-72 - a cleverly designed, beautifully made and exquisitely finished sliding folding door system that features a unique free-glide running system.

Offering sightlines of 72mm and chamfered beading, it provides a more traditional style and given its innate strength, it means that it can accommodate door sets of up to twelve doors in a single configuration, as well as corner and bay set ups.

Inspired by colour...

Make it everything you've always wanted, make it yours.

With over 150 different RAL shades to choose from, you can be sure to find a colour that suits your style, no matter how subtle or outrageous it may be.

Ranging from bright primary shades through to candy pastels and deeper earthy tones, our extensive colour palette is guaranteed to offer inspiration to homeowners and interior designers alike.

To take this even further, you can take advantage of our dual colour option, which means your exterior colour can complement the building style while the interior frame can blend in or contrast with your colour scheme inside. Many of our RAL colours also come with the option of offering a matt, satin or gloss finish.

In order to make this finish truly flawless, the highest grade power coating is applied to our aluminium. Durable yet smooth to the touch, it offers the benefit of being highly resilient to the elements.

Your doors when you want them.

Should you decide on one of our popular colours, you will benefit from a never seen before lead time...

Origin's 'Your Lead Time, Not Ours' delivery promise means that the door's delivery date can be specified at the point of ordering, so the manufacturing schedule is controlled by your requirements.

Whether it's for a day, a week or a month's time, Origin can deliver.

Popular colours span from Hipca White to Jet Black and cover all the metallic shades in between. Also included in the popular range colour range is a timeless dual colour option and two authentic looking woodgrain finishes.*

Our popular colour range is available on a 24-hour lead time...

View page 9 for our popular colour range.

**Popular colours are different for the OB-49 and OB-72.*

The slave and D-handle – both of which have been specifically designed by Origin to withstand a pull of 1600 Newtons – are available in any one of the 150 RAL shades or a stainless steel effect finish, so they can be matched or contrasted to the door itself.

Bespoke to you...

With Origin, the only limit is your imagination...

Your home, your doors – with all the little details just as you want them. As with everything Origin, all of our products are bespoke and custom to you, and the Origin Door is no exception.

Your door can be specified from one through to twelve door sets, and individual door leaves can be as narrow as 400mm, as wide as 1200mm and as tall as 3025mm, so there is guaranteed to be a configuration available that will suit your requirements.

Whether you opt for the OB-49 or the OB-72, your home will benefit from a sophisticated and timeless feel as the doors allow a flow of natural light to stream in, helping provide a new transitional way of living and changing the way you interact with your outside world.

Choose your preferred system, overall size, number of doors, configuration, internal and external colour, your preferred threshold option, whether you want the doors to open in or out, handle style and colour, then let us create the architectural dream that is the Origin Door.

E. Natural Oak and Golden Oak	Light Oak

Hardware, components and accessories...

Little things that mean a lot...

We've left nothing to chance in the creation and manufacture of the Origin Door. Every detail has been scrutinised, every process meticulously tested and every component designed to ensure all elements perform flawlessly.

As Origin exclusively design and manufacture the award-winning products at our Buckinghamshire based factory, it means that everything is centrally controlled, from sourcing right through to delivery.

This includes the design of all of the components that

make up the Origin Door, ensuring that true innovation has been engineered at every level, because for us, having components that are specifically designed for purpose offer a better performance, rather than a one size fits all, off-the-shelf solution.

Take the gearbox for example - it may be small, but don't underestimate its contribution, power or importance. It's responsible for operating the shoot bolts and locking the doors in place. Its lightweight structure has been meticulously tested to the extremities to enhance performance without compromising on security.

Life with no boundaries...

The slim sightlines and expanse of space offered by the Origin Door can transform a home by removing the barrier between the inside and out. The bespoke nature of every Origin Door means that you can reduce that barrier further through a choice of thresholds.

Weathered, non-weathered and mobility options are available, so you can pick the right option for your home depending on where the doors are going and how exposed to the elements they will be.

With our cleverly engineered weathered option, the track can be recessed and sunk into the floor, leaving a minimal step into your new space. This threshold type ensures a home is kept watertight and weather protected.

Non-weathered options offer a level floor finish and create a seamless transition between inside and out. Non-weathered options are largely recommended for internal usage. Mobility thresholds are only available on French and single doors.

Our aluminium brings
benefits that you can
and can't see...

Aluminium...

Style and slim sightlines are nothing without the strength and security that aluminium brings.

Extremely strong yet weighing 67% less than steel, Origin uses premium grade aluminium across all products.

Needless to say, as with all things Origin, the aluminium that we use is far from average. We only use prime billets - none of the aluminium we use has been made up from re-melting scraps - which ensures much better control over the overall formulation, allowing a greater finish to be achieved.

Additionally, another reason for aluminium being Origin's material of choice is because it's infinitely recyclable. Read more about our environmental accreditations on page 41.

Our aluminium brings benefits that you can and can't see. In terms of those you can't see - its innate strength makes the doors physically secure, energy efficient and highly durable. The frames are also resilient to flexing, warping and corroding in varying weather conditions.

Our aluminium is hugely versatile and strong enough to easily accommodate complex door layouts, such as moving corner posts and bay setups, without being too heavy.

As for the benefits you can see – you will only need to touch and feel an Origin Door to understand.

The sightlines of an Origin Door are stunningly slim to ensure a maximised view, and the frames have the highest grade powder coating, to ensure an overall superior finish.

It's the quality, strength and durability that aluminium brings that allows Origin to provide such long guarantees.

See page 41 for more information on our environmental accreditations.
