Important Issues

- Use of the data is governed by the Aderyn Terms & Conditions as agreed on the client's Data Enquiry and Release Form.
- Unless otherwise agreed, you must not share the data or the method for accessing it with anyone other than specified Data Users.
- Confidential information has been removed from this Public report.
- You should not amend any part of the downloaded records.
- Unless otherwise agreed, use of the data is valid until the Expiry Date (21/09/2023).
- The data was generated on the Enquiry Created date (21/09/2022) and is not live.
- Please contact us if you have any questions about using the data or wish to add further Data Users.

Notes

- The LERC Wales Aderyn commercial enquiries system uses a search system which reports species (usually high priority or protected species) within a specified search radius or buffer (as specified in the selected search package). With the exception of Package A (BARB searches), a search will also include high priority 'Mobile Species', such as bats, otters, amphibians and certain invertebrates, which lie outside the specified search radius. They have been selected as 'Mobile Species' as their territory (possibly due to foraging activity or life cycle) could intersect with the search radius.
- NRW have identified a number of species for which data is exempt from general release as described under Environmental Information Regulations. For further information click on this link (http://www.bis.org.uk/storage/library/NRW_Data_EFGR__resolution_release.pdf).
- For further ecological advice on records in this report please contact relevant County Recorder which can be found on LERC websites (where relevant).
- For detailed information on Designated Sites in Wales go to NRW website (<https://naturalresourceswales.gov.uk/guidance-and-advice/environmental-topics/wildlife-and-biodiversity/protected-areas-of-land-and-seas/find-protected-areas-of-land-and-sea/?lang=en>).
- Package A (BARB searches): If this is a Bats and Roof-nesting Birds report, please note that 'roof-nesting birds' includes all records (including non-breeding sightings) of the following species which habitually nest in buildings and roof-spaces: Common Kestrel (*Falco tinnunculus*), Peregrine (*Falco peregrinus*), Lesser Black-backed Gull (*Larus fuscus*), Herring Gull (*Larus argentatus*), Barn Owl (*Tyto alba*), Little Owl (*Athene noctua*), Common Swift (*Apus apus*), Jackdaw (*Corvus monedula*), Swallow (*Hirundo rustica*), House Martin (*Delichon urbicum*), Wren (*Troglodytes troglodytes*), Starling (*Sturnus vulgaris*), Black Redstart (*Phoenicurus ochruros*), Common Redstart (*Phoenicurus phoenicurus*), House Sparrow (*Passer domesticus*), Pied Wagtail (*Motacilla alba*).

- Please note that records of the same grid reference and species have been concatenated into a single row in all the provided data outputs. This process will be indicated in the 'date' column, which will state the number of records plus first and last year of recording, e.g. '2 records, between 2011 and 2013'. Other fields such as Recorder(s) and Comments will be concatenated. If you require the full details for each record, please contact the LERC.

Data Description

- **Distance:** Indicates the distance, in metres, between the grid reference of the record (using the central point of the grid square) and the centre of the search location.
 - **Grid Reference:** Full grid reference based on the Ordnance Survey grid system. For any Sensitive Species Records, this cannot be released into the Public Domain.
 - **Status:** Any local, national or international conservation statuses or legal protection which apply to this species and whether it is included in any Local Biodiversity Action Plans. See 'Abbreviations' for more details.

Terms and Conditions for use of LERC Wales Aderyn (Biodiversity Information Reporting Database) Service

Full access to biodiversity records either viewed or downloaded through Aderyn or eMapper will only be granted to approved, registered users and are subject to Terms and Conditions of Data Release and Download as below. Please read the following Terms and Conditions carefully as they form an integral part of the 'data supply' process.

Sensitive & Confidential Information

Data supplied may contain sensitive species information as defined by Natural Resources Wales (NRW). A condition of the Data Supply agreement says that LERC Wales may only release sensitive species records at full resolution under licence to 'trusted users'. Sensitive species information should not be released at full resolution to members of the public or for education purposes. For further information on NRW sensitive species click on link. The Public pdf report in eMapper is available for public release, with the sensitive information removed.

1. Data marked as sensitive or confidential are provided outside the Environmental Information Regulations 2004 (EIR) and the Freedom of Information Act (FoIA) 2000 (to prevent its becoming by default "public information"). These data are issued only to registered users or those 'Data Users' specified in the data request.
2. When held by a public body (as defined separately by the FoIA and EIR), the data will still be subject to FoIA and EIR, but proper regard must be given to its level of sensitivity in assessing whether to release this data in response to a request under that legislation in a public interest test.

General Terms of Data Release

3. Registered 'data users' must not pass on or share their Aderyn User Name or Password with any other person.
4. Data supplied by LERC Wales ('the data') and any online access to data, e.g. through Aderyn or eMapper Link, as well as any derivative of 'the data', such as downloads, electronic and paper tables and maps, can be accessed only by those specified as registered 'Data Users' in the data request and that they have received a copy of these 'Terms and Conditions'.
5. The 'Data User' cannot pass 'the data' onto any unspecified third parties without the permission of the relevant LERC.
6. The 'Data User' may not copy, distribute, disseminate, publish or broadcast 'the data' in any format, including on the Internet, without the permission of the relevant LERC.
7. I agree that where other parties require access to 'the data', I will direct them to the relevant LERC.
8. 'The data' must not be entered into a computerised database or Geographic Information System (GIS) for a period longer than 12 months, unless otherwise specified by the relevant LERC.
9. 'The data' should be kept secure from unauthorised or accidental use, access, disclosure or loss, and all reasonable practical steps taken to ensure the security of 'the data'.
10. The 'Data User' cannot use 'the data' for any purpose other than that for which it was requested.
11. Permission to use 'the data' expires 12 months from when 'the data' was produced, the 'Search Date'.
12. 'The data' should be deleted or destroyed within 12 months. Contact the relevant LERC within one month of 'Expiry date' if access to 'the data' is still required.
13. 'The data' requested should be used for legitimate and legal purposes.
14. The 'Data User' nor anyone else specified in 'the data' request, should have been investigated for or convicted of any form of wildlife crime.
15. No 'Data User' should have previously misused data obtained from other LERCs.
16. The copyright of raw biological records remains with the original recorder and that copyright of processed data and reports belongs to the relevant LERC.
17. The 'Data User' will not hold the LERC or its data suppliers liable for problems and/or financial loss, which might arise from inaccuracy of any data supplied by LERC Wales.
18. Please acknowledge the relevant LERC in any publication or report produced using data it has supplied. A copy should be supplied at no charge to the relevant LERC where appropriate.
