Key Plan
not to scale

Tree 1297 is a Elm, Huntingdon *(Ulmus glabra x minor)*. A hardy cultivar, the Huntingdon elm is a hybrid with some resistance to the devastating Dutch elm disease. The only tree of this species in the park.

Trees are to be removed for proposed drainage routes.

Trees 1800-1806 have been selected as sacrificial due to their low importance in order to protect tree 1297.

Existing foul water run

Proposed surface water run

Abandoned pipe runs

New attenuation tank
