# 1 INTRODUCTION

## 1.1 Background

1.1.1 Asbri Transport Limited has been appointed by Morgan Sindall to produce a Construction Traffic Management Plan (CTMP) in support of an application for the proposed development of a 1.36MW solar park on 2.95 hectares of land to the east of Pen Y Dre High School and south of the A465 Heads of the Valleys Road in the Gurnos area of Merthyr Tydfil. The proposed site layout is shown in **Appendix A**.

1.1.2 This CTMP aims to ensure that the impacts of construction traffic movements associated with the development are managed in a manner that minimises negative impacts on local highway users, existing highway infrastructure and the wider environment.

1.1.3 Consideration will need to be given to how construction traffic will reach the site from the Strategic Road Network (SRN), and how to minimise any impact construction traffic may have on neighbouring communities.

1.1.4 It is recognised that the temporary construction phase of the development needs to be carefully managed.

1.1.5 The purpose of a CTMP is to identify suitable and safe routes that can accommodate the movements associated with construction material during the construction phase, and to establish measures to reduce any interruption and/or delay to existing vehicle traffic to ensure that the impacts of construction traffic in the vicinity of the site and on the surrounding highway network are kept to a minimum.

1.1.6 The primary considerations for the routing strategy are as follows:

- To use the shortest route from the access point of the site to the Strategic Road Network (SRN);
- As far as possible use 'A' roads as a priority followed by 'B' roads, 'C' roads and then 'unclassified roads';
- Where possible avoid single carriageway roads unless these provide direct access to the construction site; and;
- To avoid settlements and sensitive receptors to minimise impact on villages and towns and sensitive road users.

1.1.7 The location of the proposed development site is shown in **Figure 1.1**.

Figure 1.1 Site Location

1.1.8 The proposed development has been subject to a pre-application enquiry with Merthyr County Borough Council. The Council's response includes the request for a Construction Traffic Management Plan, which would include the following:

- The means of access into the site for all construction traffic,
- The parking of vehicles of site operatives and visitors, shown on plan
- The management of vehicular and pedestrian traffic,
- Loading and unloading of plant and materials, shown on plan
- Storage of plant and materials used in constructing the development, shown on plan
- Wheel cleansing facilities, shown on plan
- The sheeting of lorries leaving the site.

1.1.9 Traffic associated with the operation of solar parks is minimal with only the occasional maintenance vehicle requiring access.

## 2 SITE LOCATION & EXISTING SITUATION

### 2.1 Introduction

- 2.1.1 As outlined in section 1 above, it is proposed to construct a 1.36MW solar park on 2.95 hectares of land to the east of Pen Y Dre High School in the Gurnos area of Merthyr Tydfil. The site location and the surrounding local network is shown in **Figure 2.1**.

Figure 2.1 Site Location and Extent

- 2.1.2 The site is an irregular parcel of land located immediately to the east of Pen Y Dre High School and to the west of First Avenue. Immediately to the south of the site the new Goetre Primary school is being constructed, with the land raising upwards from the northern side of the school site and reaching a plateau are at the western extent of sixth Avenue. The development site itself is a greenfield site consisting of semi-improved grassland and marshy grassland.
- 2.1.3 To the north of the site there are school playing fields serving Pen Y Dre High School, with Gurnos Ring Road immediately to the north and running parallel and to adjacent to the nearly completed the A465 Heads of the Valleys Road, whose improvement to dual carriageway standard is scheduled for the summer of 2025.

2.1.4 The improvements will impact the route construction vehicles will be able to take to the proposed site as there are several temporary routes and roads in place to accommodate movements.

2.1.5 Within the immediate vicinity of the site, there are a number of residential streets which provide access to the surrounding area.

## 2.2 Baseline Traffic Flows

2.2.1 In order to obtain the most recent traffic flows on the unnamed road in the vicinity of the development site, Automatic Traffic Counts (ATC's) were undertaken at 3 locations surrounding the site, which are listed below and shown in **Figure 2.2**:

1. Western end of Sixth Avenue
2. Sixth Avenue between First Avenue and Galon Uchaf Road priority junctions
3. Galon Uchaf Road between Sixth Avenue and Seventh Avenue

2.2.2 Surveys covered a 7-day period from Friday 31<sup>st</sup> January – 06<sup>th</sup> February. Each of these roads are residential roads subject to 20mph speed limits, with the western section of Sixth Avenue forming a dead end at the proposed site access.

2.2.3 The raw survey data is shown in **Appendix B**.

Figure 2.2: Automatic Traffic Count (ATC) Locations

## Total Vehicles

2.2.4 **Table 2.1** and **Table 2.2** summarise the surveyed traffic flows for the average weekday and weekend respectively. **Figure 2.3** and **Figure 2.4** show the average weekday and Saturday daily traffic flow profiles.

2.2.5 The Proposed hours of operation and the associated 2-way traffic flows are:

- Weekday: 0700-1800
  - o Site 1: 78 vehicles (average of 7 per hour)
  - o Site 2: 1,269 vehicles (average of 115 per hour)
  - o Site 3: 3,424 vehicles (average of 311 per hour)
- Saturday: 0700-1400
  - o Site 1: 17 vehicles (average of 2 per hour)
  - o Site 2: 498 vehicles (average of 71 per hour)
  - o Site 3: 1,440 vehicles (average of 206 per hour)

2.2.6 These observed traffic flows are reflective of the roles of these roads in the local road network, with Galon Uchaf Road being a significant distributor road connecting Merthyr with the A465 Heads of the Valleys Road, while the eastern section of Sixth Avenue is a local residential distributor road. The western end of Sixth Avenue, located west of the First Ave, forms a short dead-end street, serving 8 residential dwellings.

2.2.7 Saturday flows are generally lower than the weekday flows. The daily flow profiles for the average weekday show the normal AM (8am-9pm) and PM tidal peak hours with an extended PM peak between 2pm and 6pm, taking into consideration school related traffic and peak spreading movements. For the Saturday there is the normal Saturday afternoon peak with very little off peak traffic.

| Hour Start   | Weekday Average Traffic Flows (vehicles) |           |           |                                     |            |             |                                           |             |             |
|--------------|------------------------------------------|-----------|-----------|-------------------------------------|------------|-------------|-------------------------------------------|-------------|-------------|
|              | Site 1: Sixth Ave west of First Ave      |           |           | Site 2: Sixth Ave east of First Ave |            |             | Site 3: Galon Uchaf Rd north of Sixth Ave |             |             |
|              | NB                                       | SB        | 2-way     | EB                                  | WB         | 2-way       | EB                                        | WB          | 2-way       |
| 0            | 0                                        | 0         | 0         | 5                                   | 4          | 9           | 8                                         | 11          | 18          |
| 1            | 0                                        | 0         | 0         | 2                                   | 1          | 3           | 2                                         | 3           | 6           |

Table 2.2 Saturday Traffic Flows

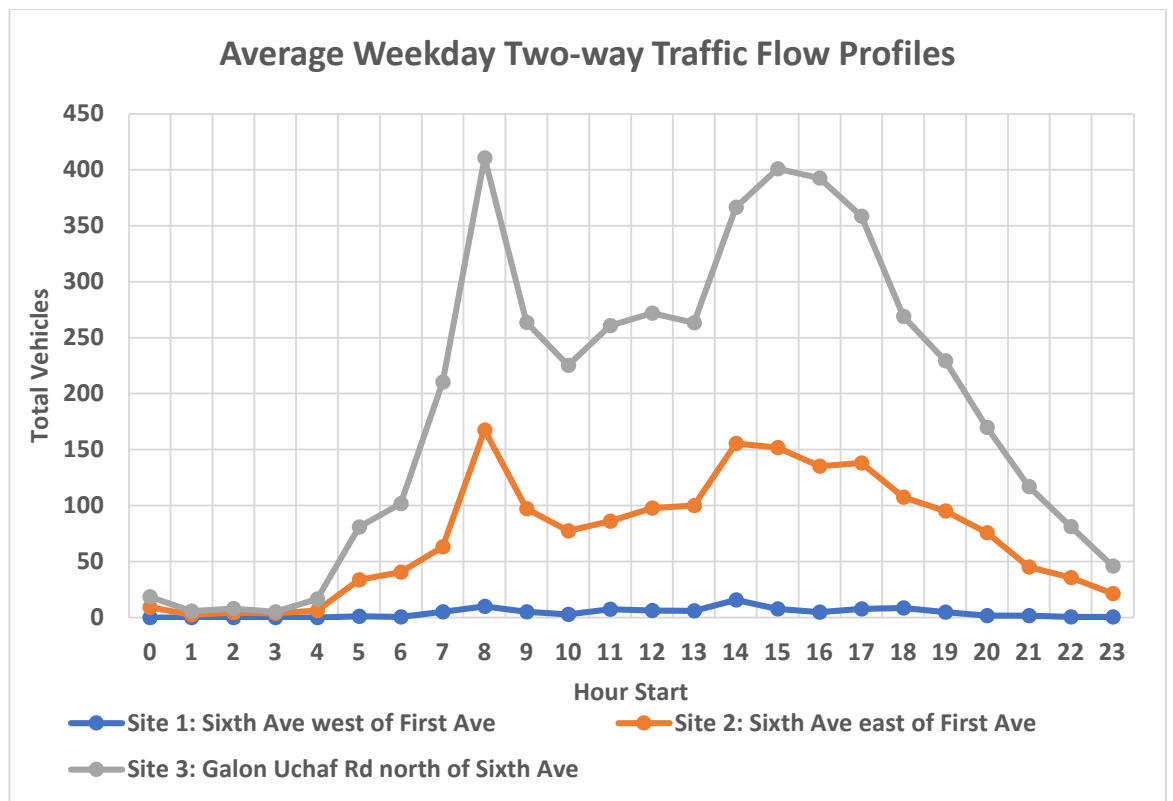

Figure 2.3 - Average Weekday Daily Traffic Flow Profiles

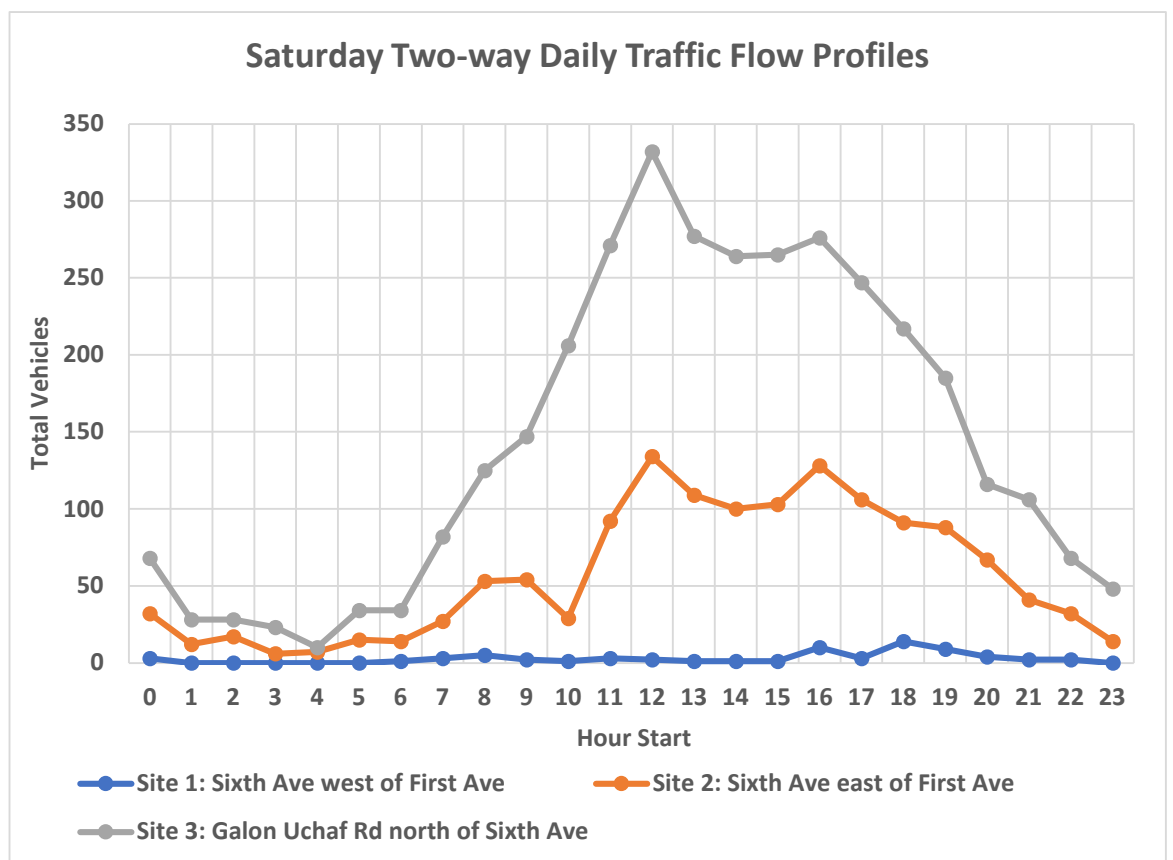

Figure 2.4 – Saturday Daily Traffic Flow Profiles

## **HGV**

- 2.2.8 With regards to Heavy Goods Vehicle flows, given the nature of the roads the HGV flows are low. For Site 1, the western part of Sixth Avenue the average weekday two-way daily total is 4 vehicles, a percentage share of 5%, with a Saturday daily total of vehicles, a percentage share of 7.5%.
- 2.2.9 For Site 2, Sixth Avenue east of First Avenue, the HGV percentages for the average weekday and the Saturday are 0.7% and 0.4% respectively. For Site 3, Galon Uchaf Road north of Sixth Avenue, the HGV percentages for the average weekday and the Saturday are 1.8% and 0.6% respectively.

### 3 PROPOSED SITE ACCESS ARRANGEMENTS

- 3.1.1 The primary access into the site and to the construction compound will be located at the western end of Sixth Avenue, to the west of First Avenue, where there is existing gated field access. The existing access is shown in **Plate 3.1** where it is shown to be a gated farm access and a public footpath with a Kissing Gate to its north, which provides access to Pen Y Dre High school.
- 3.1.2 Swept path analysis of construction delivery vehicles accessing the site is shown in **Appendix C**. Given the width (approximately 5m) of for the western section of Sixth Avenue, adjacent to the proposed site and the presence of on-street residential parking, a temporary parking restriction may be required when the larger construction delivery vehicles are accessing the site.
- 3.1.3 The access of larger vehicles to the site would be carefully planned and managed, while there is a degree of residential parking on the wide footpaths on this section of Sixth Avenue. This may provide some scope for the temporary local management of parking.
- 3.1.4 It is intended to retain the use of this access for entry into the construction compound and for ongoing maintenance of the site. Swept path analysis of the internal arrangement of the construction compound is shown in **Appendix D**.

Plate 3.1 Existing access looking west from Sixth Avenue

- 3.1.5 Vehicles will be able to drive straight into the site off the western section of Sixth Avenue with the linear alignment of Sixth Avenue providing good visibility for oncoming traffic. Vehicle speeds are restricted.
- 3.1.6 Most construction materials will be offloaded and stored within the site compound and thereafter distributed to the relevant construction areas in smaller vehicles.
- 3.1.7 From the proposed access points, construction vehicles will travel along temporary roads within the site. Temporary surface material will be applied to the road in the form of crushed gravel, below which subgrade should be free of depression and be at a grade to provide effective drainage. Any topsoil stripped from the site will be stored or spread on site with potential to be reused when reinstating the pre-construction state of the route.
- 3.1.8 As the construction of the access roads will require the use of heavy machinery, it will take place during the normal working hours prescribed in this document.
- 3.1.9 Delivery vehicles, including 16.5m articulated vehicles, 10m rigid vehicles and a mobile crane will be able to enter and exit the compound area in a forward gear.
- 3.1.10 Once construction of the solar farm is complete, access to the site will be retained for maintenance purposes. However, as this will only require the use of light goods vehicles these will utilise the existing farm access central to the site with the construction access removed.

### **3.2 Construction Traffic Route**

- 3.2.1 Construction and delivery vehicles accessing the site will be required to access the wider road network and the Strategic Road Network (SRN) via the A465 Heads of the Valleys to the north of the site. Construction and materials delivery vehicles will be prohibited from accessing the site from the south via the Gurnos Estate or the residential and distributor roads within Merthyr Tydfil.
- 3.2.2 Between the development site and the A465 Heads of the Valleys Road the construction vehicle route is along both sections of Sixth Avenue, crossing First Avenue, then along Galon Uchaf Road (right turn into Sixth Avenue inbound left turn out of sixth Avenue outbound) to/from the Gurnos Ring Road/Brynau Road/Rocky Road/Mitchell Crescent/Galon Uchaf Road junction.

- 3.2.3 As mentioned above Phases 5 & 6, Hirwaun to Dowlais Top, of the A465 Heads of the Valleys dualling scheme is scheduled for completion during the summer of 2025. Amongst the last sections of the dualling of the A465 Heads of the Valleys is the section to the north of Merthyr and adjacent to the development site.
- 3.2.4 As of February 2025, works were still ongoing along this section with obvious implications for the construction traffic route accessing the development site, dependent upon the exact timing of the completion of the works in the vicinity of the site.
- 3.2.5 Once the dualling has been completed access between the A465 Heads of the Valleys and the northern part of Merthyr, including the Gurnos Estate, involve the use of a new grade separated junction located to the north of the Pen Y Dre High School, The Prince of Wales Hospital Junction, as shown in **Figure 3.1**.

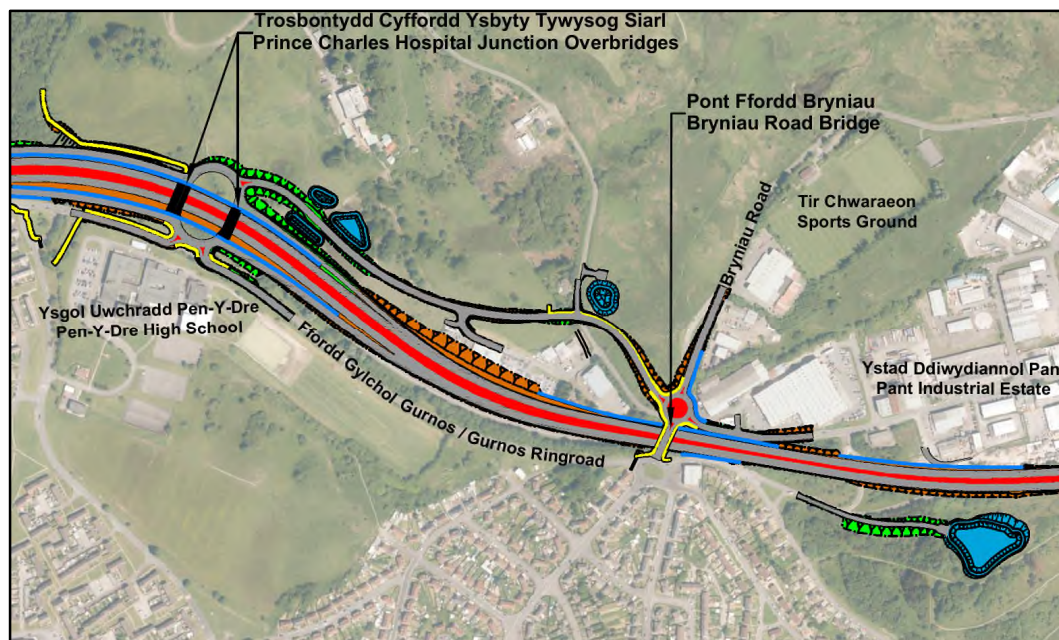

Figure 3.1 Proposed Prince Charles Hospital Junction on A465 Heads of the Valleys Road

- 3.2.6 As can be seen this new grade separated junction connects with the Gurnos Ring Road at two locations in the general vicinity of the proposed development site. Firstly, directly from the new junction just to the east of Goitre Lane and immediately to the north of the main buildings of the Pen Y Dre High School.
- 3.2.7 Secondly, at the existing priority roundabout connecting the Gurnos Ring Road/Bryniau Road/Rocky Road/Mitchell Crescent/Galon Uchaf Road, via a new link running east-west to the north of and parallel to the A465 Heads of The Valleys Road between the new junction and Bryniau Road.

- 3.2.8 At this location the A465 Heads of the Valleys Road scheme included the provision of a new roundabout formed at the junction of Bryniau Road and the Pant Industrial Estate access road. This new junction will be connected to the Gurnos Ring Road/Bryniau Road/Rocky Road/Mitchell Crescent/Galon Uchaf Road via the existing bridge over the A465.
- 3.2.9 Dependent upon the status of the A465 Heads of the Valleys scheme during the construction period the construction and delivery vehicle route would be:
- Pre-Completion: via Rocky Road and the temporary roundabout on the A465 Heads of the Valleys Road
  - Post Completion: via Gurnos Ring Road and the prince Charles Hospital junction.
- 3.2.10 The pre and post completion construction and delivery vehicles routes are shown in **Figure 3.2** and **Figure 3.3** respectively. These routes have been identified to minimise impacts on the surrounding highway network, specifically avoiding vehicles using less suitable routes. The contractor will be notified of the agreed construction routeing strategy and all suppliers and sub-contractors will be expected to comply.
- 3.2.11 The current access arrangements between the A465 Heads of the Valleys Road and the northern part of Merthyr, including the Gurnos Estate, involve the use of a temporary at grade priority roundabout located just to the east of the Gurnos Ring Road, Rocky Road and Galon Uchaf Road, as shown in **Plate 3.2**.

Figure 3.2 Pre Completion Construction Traffic Route

Plate 3.2 A465 Heads of the Valleys Road Temporary Roundabout Junction with Rocky Road (start of February 2025)

- 3.2.12 The future access arrangements between the A465 Heads of the Valleys Road and the northern part of Merthyr, including the Gurnos Estate, will involve the use of the new Prince Charles Hospital grade separated Junction connecting directly with the Gurnos Ring Road and the realigned Pant Industrial Estate Access Road.

3.2.13 The current condition of this new grade separated junction is shown in **Plate 3.3**.

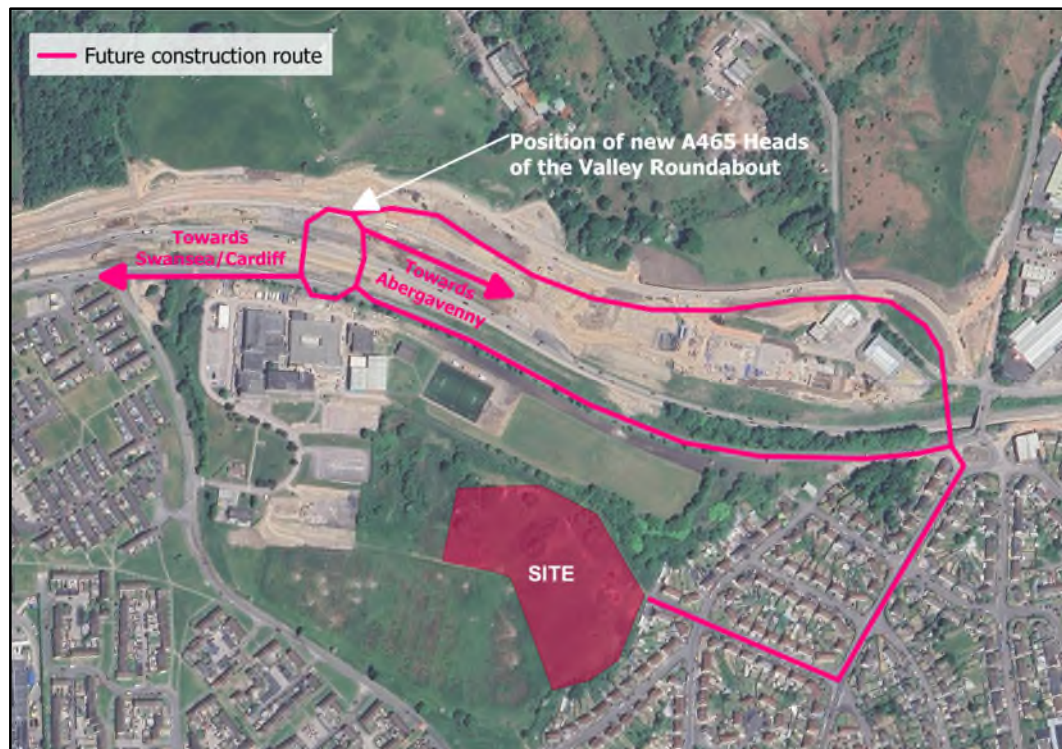

Figure 3.3 Post A465 Completion Construction Traffic Route

Plate 3.3 Prince Charles Hospital Junction – eastern overbridge looking North from Gurnos Ring Road (start of February 2025)

3.2.14 Upon leaving the site, vehicles will travel the reverse journey, also accompanied by escort vehicles.

3.2.15 It is proposed that escort vehicles will accompany larger HGVs to and from the site. These escort vehicles will be in constant communication with the drivers of the HGVs to provide advice as to when the approach route to the site is clear. This will ensure that no conflict will occur along the single carriageway stretch of the approach road.

- 3.2.16 To enhance visibility and in conjunction with the escort vehicles being proposed in support of the vehicular movements, a banksman would also be present at this entrance / exit.
- 3.2.17 The introduction of the escort system will alleviate the impact of vehicles coming into conflict on the traffic route.
- 3.2.18 **Table 3.1** details an assessment of the route from the A465 Heads of the Valley Road through a series of pictures.

|                                                                               |                                                                                      |

Table 3.1 Construction and Delivery Route pictures

### 3.3 Pedestrian Access

- 3.3.1 The northern boundary of the proposed development site is defined by an existing shared footpath/cycleway, listed in the Active Travel Network Map as Route EGW02, as shown in **Figure 3.4**. This route connects Pen Y Dre High school with the network of routes within Gurnos and wider covering Merthyr, via Sixth, First and Fourth Avenues.
- 3.3.2 This route will be retained and not be impacted by traffic movements at the proposed development, being separated by a secure fence line.

## **4 CONSTRUCTION TRAFFIC GENERATION**

### **4.1 Introduction**

- 4.1.1 This section of the report provides a n indicative assessment of the trips associated with staff and deliveries of components and construction materials. It considers the type and anticipated number of vehicles accessing the site, and any mitigation measures that may be required.

### **4.2 Construction Programme**

- 4.2.1 The construction programme is anticipated to be conducted over a single phase of development over approximately **30 weeks**, including site preparation, delivery of materials and construction of the panels themselves.
- 4.2.2 The delivery of materials will therefore likely be spread throughout these phases of construction dependent on both their availability, the availability of storage and the requirement for materials to support construction on site.
- 4.2.3 It is envisaged that larger vehicles delivering to the site will arrive and depart from the site at times when background movements are at their lowest to reduce the impact of traffic being held.

### **4.3 Construction Traffic Hours**

- 4.3.1 To minimise the disruption to general traffic movements along the surrounding road network during the AM and PM peak hours, restrictions on times and days when construction traffic vehicles can access the site are proposed.
- 4.3.2 Hours of construction will be from 0700 to 1800 Monday to Friday and between 0700 to 1400 on Saturdays. Deliveries would be scheduled to avoid the highway network peak hours between 0800 to 0900 in the morning and 1400 to 1800 in the afternoon for a weekday and before noon on a Saturday.
- 4.3.3 Except in case of emergency, any work required to be undertaken outside of the core working hours (not including repairs or maintenance) will be agreed with the local highway authority prior to undertaking the works.

#### **4.4 Staff Numbers**

- 4.4.1 It is anticipated that on a regular basis that there will be up to 6 Morgan Sindall and contractor management staff on site, with the number of construction workers on site varying on a day to day basis over the proposed 30-week construction period.
- 4.4.2 It is estimated that on any given day the maximum number of staff on site would be 25, with the exact number depending on each phase of construction. Access arrangements will look to be arranged for staff wherever possible however some staff will require equipment on site which will need to be available as and when required.
- 4.4.3 Once construction is complete and the site is operational, there will be no full-time staff employed at the facility. It is anticipated that between 10 to 20 visits will be made to site per year for maintenance purposes.
- 4.4.4 Staff trips will be made primarily by car or van. A temporary parking area will be provided for construction staff within the main site construction compound. No specific routeing will be imposed on staff travel to site unless driving a goods vehicle in which case the designated route must be followed. It is anticipated that staff will arrive at site during the morning peak period and depart in the evening peak period.
- 4.4.5 It is anticipated that construction operations will be undertaken between 0730 and 1800 Monday to Friday and 0730 to 1400 on Saturday, with the majority of staff entering and leaving the site before and after the peak traffic flow periods on the surrounding road network. As evidenced by the traffic flow data collected along the proposed site access road as reported in Section 3 this road experiences a low level of traffic movements throughout the day.

#### **4.5 Construction Vehicles**

- 4.5.1 The components required to construct solar parks are generally shipped from overseas. Solar panels, inverters, mounting systems and cabling are usually shipped in 40ft containers and delivered by 16.5m (44 tonnes) articulated vehicles.
- 4.5.2 The proposals require deliveries associated with the following:
- Installation of solar panels. These may be delivered by 10m rigid curtain sided vehicles or articulated service vehicle;

- Erection of the frames that support the arrays. These are usually shipped in 40ft containers and transferred to site by 16.5m (44 tonnes) articulated vehicles;
- Inverters, which can weigh up to 21 tonnes to power up to a 1.36 MW park, and will be transported to site by an articulated vehicle;
- In-field transformers/substation weigh about 4 tonnes and measure approximately 6m x 3m and will be transported to site by either a 10m rigid vehicle or articulated vehicle;
- A secure compound including porta cabins for office, site welfare and storage facilities will be delivered to site by articulated vehicles;
- Site set up and enabling works including general building materials and aggregates. These materials are likely to be sourced locally and will typically be delivered in 10 tonne lorry loads; and,
- Finally, a mobile crane may be needed to move the in-field power station and the Distribution Network Operator Connection (DNOC) in to position, and this will be brought to site when required.

4.5.3 It is intended that all deliveries will be carried out by vehicles that fall within the current UK limits for weight (maximum 44 tonnes), height (maximum 10m for a rigid and 16.5 for an articulated vehicle) and width (maximum 2.55m excluding wing mirrors). No deliveries of abnormal loads are expected for the construction of the solar park.

## **4.6 Mitigation Measures**

4.6.1 Construction and delivery vehicles accessing the site will be required to follow a construction routeing strategy using the routes identified above in Section 3.2, in order to minimise impacts on the surrounding highway network. These routes will be agreed as part of a traffic management plan with the highway department at The Vale of Merthyr Tydfil County Council. All suppliers and contractors will be notified of the agreed construction routeing strategy and expected to comply.

4.6.2 A site delivery system will be in operation in order to control the time of arrival of deliveries.

4.6.3 A construction signage strategy will be agreed with the Highway Authority and implemented prior to construction on site. This signage strategy will be in place along the Construction traffic routes as identified above to direct vehicles to the site and to

provide other road users with advance warning of the location of the site access and the construction activity.

- 4.6.4 Access signage and signage along the route will be in accordance with Chapter 8 Traffic Signs Manual Part 2: Traffic safety measures and signs for road works and temporary situations.

## **4.7 Monitoring**

- 4.7.1 The measures detailed within this report will be monitored by the contractor to ensure they are adhered to, with delivery routes and timings recorded, in order to ensure that access arrangements operate in a manageable way and any adverse impacts avoided.

## **4.8 Operation Post Construction**

- 4.8.1 Following commissioning, minimal maintenance is expected in relation to the PV panels and other fixed elements of the site. Once operational there will be no staff based permanently on site. Visits for maintenance, cleaning and monitoring are likely to be infrequent, approximately 10 to 20 a year. These trips will typically be made by small vans or 4x4 vehicles. There will be sufficient space on site for these vehicles to enter, park and manoeuvre before exiting the site in forward gear.
- 4.8.2 Due to this very low number of vehicle movements, traffic associated with the ongoing operation of this site will have an indiscernible impact on the local highway network.

## **4.9 Access Control Measures**

- 4.9.1 A site delivery system will be in operation, with time slots allocated to deliveries outside of the peak times of the local highway network. All vehicle arrivals and departures will be recorded by the contractor. The site management will ensure that delivery timescales are communicated to suppliers to ensure compliance.
- 4.9.2 No vehicle parking, loading or unloading will take place outside of the construction compound and suitable wheel washing facilities will be installed to ensure no mud or debris is deposited on the public highway during the construction period.
- 4.9.3 As set out within Health and Safety Executive (HSE) guidance, the Banksman directing vehicle movements (signallers) will be trained and authorised to do so. On the rare

occasions when reversing is required and in addition to a competent Banksman directing vehicle movements consistent with HSE guidance, consideration will be given to:

- Aids for drivers - mirrors, CCTV cameras or reversing alarms that can help drivers see movement all-round the vehicle
- Clothing - pedestrians on site should wear high-visibility clothing

4.9.4 To avoid construction traffic congestion and nuisance to the surrounding area, all supplies and contractors will be made aware of the prescribed construction routes and time slot allocated within the booking system.

4.9.5 Access to the site will be appropriately signed to avoid congestion or queuing onto the highway. The site entrance will also be maintained and kept clean and clear.

#### **4.10 Monitoring**

4.10.1 The measures detailed within this report will be monitored by the contractor to ensure they are adhered to, with delivery routes and timings recorded, in order to ensure that access arrangements operate in a manageable way and that any adverse impacts are avoided.

#### **4.11 Remediation and Clean-up**

4.11.1 After construction activities on site have concluded, areas of work will be remediated, and no permanent structures will remain, and then returned to their pre-construction condition.

4.11.2 This will reference a condition survey which will be carried out of the unnamed approach road prior to commencement of construction.

4.11.3 Unused equipment, residual debris and materials will be disposed of off-site.

## **5 TRAFFIC NOISE & ENVIRONMENTAL IMPACT MITIGATION**

### **5.1 Introduction**

5.1.1 This section sets out specific measures to be adopted to mitigate construction impacts in pursuance of the Environmental Code of Construction Practice.

### **5.2 Construction Traffic Noise**

5.2.1 The Environmental Protection Authority released the “Environmental Criteria for Road Traffic Noise” in May 1999. The policy sets out noise criteria applicable to different road classifications for the purpose of defining traffic noise impacts. The following will be applied during construction to minimise the traffic noise impacts:

- Apply and strictly adhere to low-speed limits within the site and within the vicinity of the site onto the local road network
- As far as possible, ensure all contractor vehicles are fitted with adequate noise control equipment in good working order
- Large vehicles will not arrive or leave the site at noise sensitive times
- Ensure no parking or queuing of construction traffic on surrounding roads.

### **5.3 Environmental Conditions**

5.3.1 The potential exists for mud to be spread onto the surrounding highway network. As such, measures will be implemented to minimise this as far as possible. Measures will include (but are not limited to):

- Use of an approved mechanical water-assisted road sweeper to clean the site of any mud or debris deposited by site vehicles within the vicinity of the site. The road sweeper is to be available whenever needed and will be properly used and maintained
- The avoidance of dry sweeping large areas
- Provision of wheel washing on all site exits and lorry jet washing facilities (to include rumble grids to dislodge accumulated dust and mud prior to leaving the site where reasonably practical)
- Adequate sheeting of vehicles carrying waste materials

- A water bowser will be present on site to aid in dust control, should this be a likely issue - this may well depend on the time of year in which construction takes place
- Measures will be taken to ensure that mud and debris is not swept into gullies

5.3.2 Dust control will be best achieved at source, and if possible, activities will be carried out in a manner to preclude dust generation.

5.3.3 If dust is generated, steps will be taken to protect workers in the vicinity who shall, as a minimum, be issued with dust masks. Dust will, if possible, be contained in the location in which it is generated, and be controlled and managed therein.

## **6 SUMMARY OF MITIGATION MEASURES**

### **6.1 Summary**

- 6.1.1 Asbri Transport have been instructed by Morgan Sindall to produce a Construction Traffic Management Plan (CTMP) in support of an application for the proposed development of a 1.36MW solar park on 2.95 hectares of land to the east of Pen Y Dre High School in the Gurnos area of Merthyr Tydfil.

### **6.2 Mitigation Measures**

- 6.2.1 In order to minimise any transport impacts on the public highway due to construction and delivery vehicles, the following mitigation measures are proposed:

- Measures to reduce construction debris on the public highway including road-sweeping, and if necessary, the installation of wheel washing facilities at the site access;
- Implementation of a construction routeing strategy to ensure all construction and delivery vehicles use the most appropriate route on the wider highway network;
- A site delivery system will be in operation to control the timing of arrival of deliveries and departures;
- Introduction of a temporary traffic management protocol with appropriate signage for the duration of the construction works.

### **6.3 Conclusions**

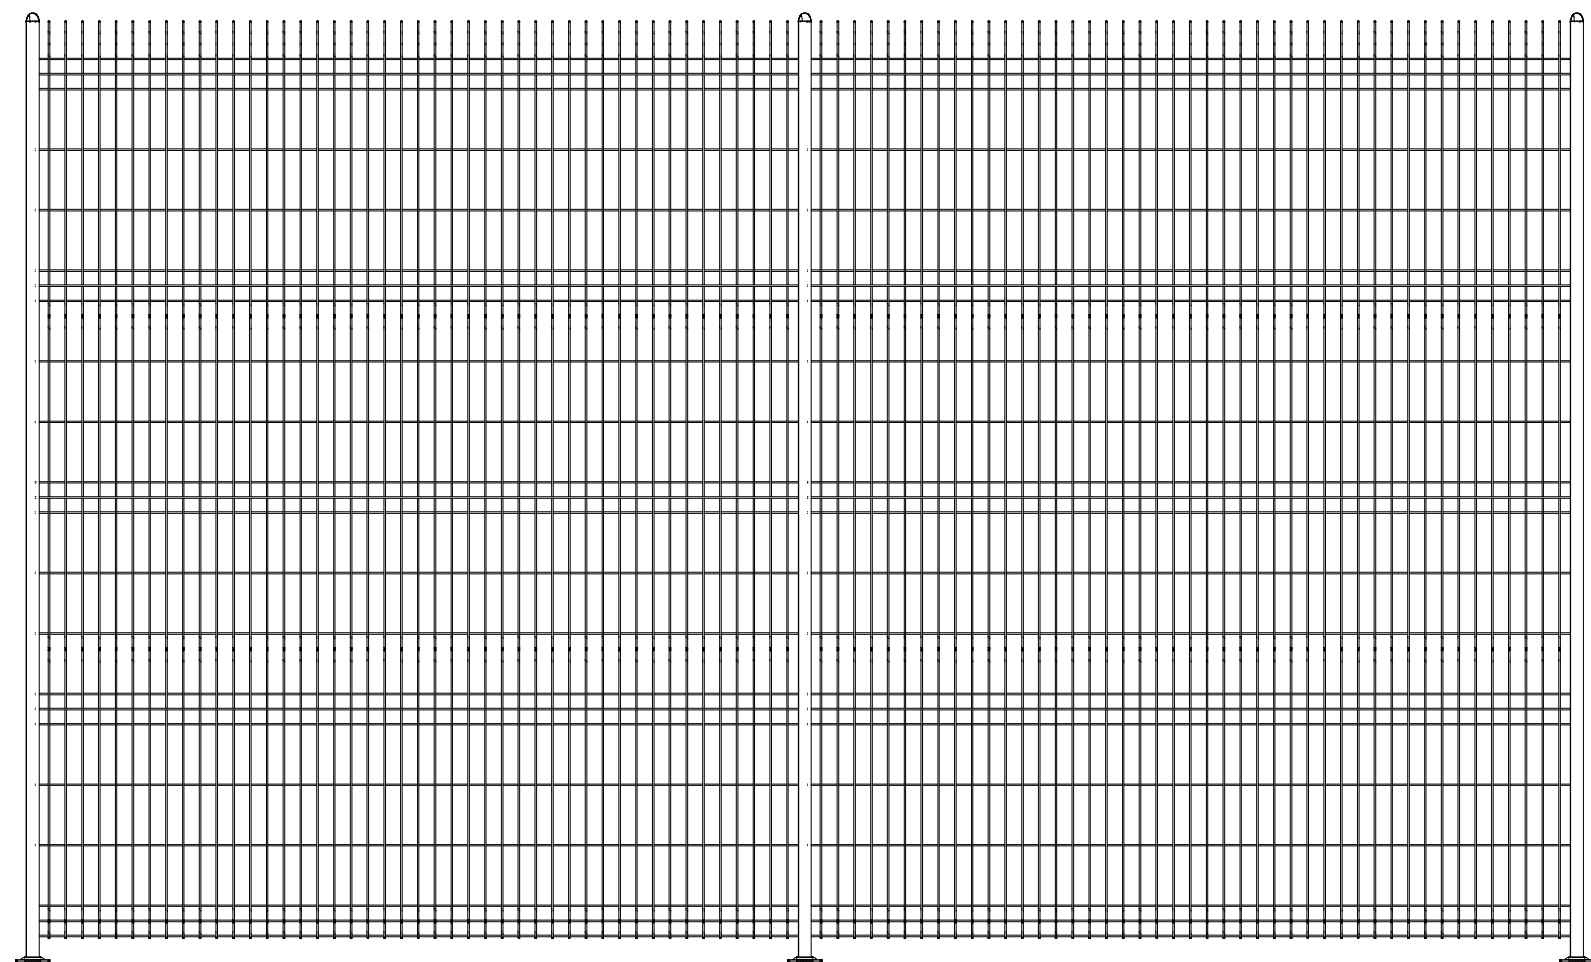

- 6.3.1 Based on this review of the proposed access to the site, it is considered that construction vehicles can be accommodated without undue adverse impact on the public highway.

Construction (Design and Management) Regulations

Design risk assessments are carried out throughout the design stage of this project in accordance with company procedures and manuals. Where reasonably possible all areas of risk applicable to design and end use of the construction have been identified and then eliminated, mitigated or recorded as a residual risk. Note that general risks of which a competent designer or contractor should be aware are not included. This drawing is to be used in conjunction with the Pre construction Information and all related documents prepared in accordance with the current Construction (Design and Management) Regulations 2015 and all applicable Health and Safety legislation as currently amended.

Disclaimer: The information contained within this drawing is based on survey information provided by the main contractor appointed Surveyor - Gwella Surveyors. Lawray Architects cannot guarantee the accuracy of the survey information. All levels, structural elements and walls have been interpolated from the 2D and 3D information supplied. The Main Contractor shall verify all levels, structural elements and walls prior to any works. The Main Contractor must inform the Design Team of any discrepancies between their level checks and the Design Proposals immediately.

# Classification Schemes

## Scheme F Classification Scheme (Non-metric)

Scheme F is an attempt to implement the FWHA's visual classification scheme as an axle-based classification scheme. This is one of several interpretations.

| Class | Vehicle Type                       | No. of Axles | Axle spacing in feet |             |             |             |             |
|-------|------------------------------------|--------------|----------------------|-------------|-------------|-------------|-------------|
|       |                                    |              | Axle 1 to 2          | Axle 2 to 3 | Axle 3 to 4 | Axle 4 to 5 | Axle 5 to 6 |
| 1     | motorcycle                         | 2            | <6.0                 |             |             |             |             |
| 2     | passenger car                      | 2            | 6.0 - 10.0           |             |             |             |             |
