Thank you for reconsulting Cyfoeth Naturiol Cymru / Natural Resources Wales on the above application. We previously provided comments on 29th April 2022 (letter reference: CAS-184537-D6F2), please note that our comments relating to land contamination, pollution prevention remain and European Protected Species (EPS) relevant.

We continue to have concerns with the application as submitted. However, we are satisfied that these concerns can be overcome by attaching conditions relating to Pollution Prevention, Land Contamination and documents relating to European Protected Species on any planning permission granted. The conditions are set out in our previous advice as noted above. Please note, without the inclusion of these conditions we would likely object to this planning application.

Air Quality

We have reviewed the additional information submitted by the applicant in relation to the Air Quality Assessment. Given the scale of the Combined Heat and Power (CHP) plant and the distance from Cwm Glo a Glyndyrys Site of Special Scientific Interest (SSSI), we are satisfied that no further information is required in relation to air quality. We have no objection to the proposed development in relation to air quality.

Other Matters

Our comments above only relate specifically to matters included on our checklist, *Development Planning Advisory Service: Consultation Topics* (September 2018), which is published on our [website](#). We have not considered potential effects on other matters and do not rule out the potential for the proposed development to affect other interests.

We advise the applicant that, in addition to planning permission, it is their responsibility to ensure they secure all other permits/consents/licences relevant to their development. Please refer to our [website](#) for further details.

If you have any queries on the above, please do not hesitate to contact us.

Yn gywir / Yours faithfully

Tanya Leck
