Title: Twynnyroddyn, Merthyr Tydfil – Transport Assessment Audit

Date: 4th August 2020

Prepared For: Merthyr Tydfil County Borough Council

Prepared By: Dave James (Technical Director – Transportation)

Tel: 02920 803574

Email: David.James@capita.co.uk

Ref: CS/100364 / Technical Note TN1

The following comments relate to the *'Twynnyroddyn (sic), Merthyr Tydfil – Transport Assessment'* by Lime Transport, dated April 2020, associated with land off Elm Tree Grove. The proposed development site is allocated for residential development and located within a 'Primary Growth Area'. The Replacement Local Development Plan (2016-2031) Policy SW3 highlights site 18 'Twynnyroddyn' as a site allocated to provide a total of 120 residential dwellings. The indicative delivery timescale for producing the housing is between 2021-2024.

The comments are set out as per the sustainable transport hierarchy set out within Planning Policy Wales – Edition 10, as referenced in section 2.3.8 of the Transport Assessment.

Walking and Cycling

A pedestrian link is shown connecting into the site into the northwest corner of the site. Confirmation is required as to if this will be accessible by all members of the public. How wide is the proposed route? This pedestrian link is between two garages and connects to a rear access lane with no lighting, resulting in personal safety concerns. Furthermore, there are no footways on this rear lane access. As this provides the only direct link to bus services from the northern part of the site, improvements are required, or else residents will not be encouraged to use this sustainable mode of transport.

At the southern end of the site, the development links to a public right of way providing access to Aneurin Crescent and the associated bus stops. The route is not paved and unlit, creating further concerns regards personal safety and use, especially at night. Are improvements to this footway linkage proposed? Provision of a network of pedestrian routes between the site and the surrounding network, including improvements to existing footpaths to the south of the site (including the link to Aneurin Crescent to the south-west) is simply stated to be likely to be a condition of consent, with details submitted to and approved in writing by the local planning authority. Confidence is required at this stage that the necessary footway/cycleways can be provided, to the required standard and to provide direct access to bus stops.

What proposals to encourage cycling are included apart from secure cycle storage within the curtilage of each dwelling? Cycling, with walking, is at the top of the Planning Policy Wales Sustainable Transport hierarchy, but there seems to be no additional facilities for cyclists within or outside the red line boundary.

The only reference to active travel within the proposals is for the provision of 'Active Travel' information within the Travel Plan Welcome Pack, including walking and cycle distances/times from local amenities and facilities within the vicinity of the site, as well as neighbouring settlements, and public transport facilities. Both shared use route WS24 and walking route WS63 are through the site.

Details of how these will be provided for within the site in terms of widths and construction should be provided. There should also be contributions to their provision outside of the redline boundary.

Public Transport

Are improvements to the bus stop infrastructure adjacent to the site proposed?

The closest bus stop is stated to be located on Glasier Road. There are closer stops located on Wallhead Road and Aneurin Crescent. Contributions to increase the frequency of the Service 38 that serves these stops should be reviewed.

Ultra Low Emissions Vehicles

Apart from in the policy section, this mode is not referenced in the Transport Assessment. Discussion with Merthyr Tydfil Highways Department is required regarding ULEV charging points at the proposed dwellings.

Other Private Vehicles

Access to adjacent houses and the electricity sub-station served from the existing stub end of Elm Tree Grove is not shown under the proposals. A proposed footway is shown across their current access. Once the existing access provision is reinstated within the design, the junction proposal for the stub end will require review.

Only a single access to the site is shown. As the number of dwellings is in excess of 100, a second emergency access would be beneficial.

Trip generation has been based on the TRICS 7.7.1 national database, using the 85th percentile rate from multi modal surveys of similar residential site elsewhere. Only 13 surveys are included in the analysis and as stated within the report included within the appendices 'Using 85th and 15th percentile highlighted trip rates in data sets of under 20 surveys is not recommended by TRICS and may be misleading'.

A more accurate estimation would be to use the trip generation rate of all the houses currently accessed off Elm Tree Grove, Oak Tree Rise, Cedar Close and Hawthorn Drive. As part of the audit, the number of dwellings accessed has been noted and a trip rate, based on the junction count undertaken at Penheolferthyr / Elm Tree Grove, calculated.

For further comparison, average and 85th percentile vehicle trips from the TRICS 7.7.1 national database has been calculated based on surveys outside of London and the Republic of Ireland, for weekday survey of sites between 50 and 200 dwellings, excluding free standing residential sites (Appendix A). Surveys of two different housing estates in Monmouthshire have also been included.

Table 4.3: Total Forecasted Weekday Vehicle Trip Attractions and Productions based on 127 dwellings

AM Peak	Vehicle Arrivals	Vehicle Departures	Total
TRICS Average (vehs only)*	14	39	53
Nedern Rise, Caldicot***	14	55	69
Twynrodyn (sic) TA, Merthyr Tydfil	11	67	78
TRICS 85 th Percentile*	20	63	83
Tree Tops**	21	69	90
Elm Tree Grove****	54	101	155

PM Peak	Vehicle Arrivals	Vehicle Departures	Total
TRICS Average (vehs only) *	34	18	52
Nedern Rise, Caldicot***	48	21	69
Tree Tops**	40	34	74
TRICS 85 th Percentile*	49	27	76
Twynrodyn (sic) TA, Merthyr Tydfil	77	17	94
Elm Tree Grove****	54	49	103

* TRICS 7.7.1 using Average and 85th percentile 'Houses Privately Owned' figures

** 22nd June 2010 Traffic Survey of 90 dwellings within the Tree Tops Estate, Portskeewett

*** May 2017 Traffic Survey of 171 dwellings within Nedern Rise, Caldicot

****Traffic survey of 98 dwellings within Elm Tree Grove, Oak Tree Rise, Cedar Close and Hawthorn Drive, Merthyr Tydfil

The comparison shows that the traffic figures used in the TA are similar to trip rates of the two residential sites in Monmouthshire and the TRICS figures calculated within the audit. However, in the AM peak they are half the observed trip rate from the adjacent housing development that accesses Elm Tree Grove.

The assignment of development traffic has been based on census to work data and therefore no account of retail, leisure or education trips in the peak periods has been taken into account. No comparison to existing turning movements to and from Elm Tree Grove has been undertaken. An audit check highlights:

From Elm Tree Grove	To Penheolferthyr West	To stub arm	To Penheolferthyr East
AM Peak: TA	45%	0%	55%
AM Peak: Observed*	53%	0%	46%
PM Peak: TA	41%	0%	59%
PM Peak: Observed	63%	0%	37%

*1 vehicle 'U' turned

To Elm Tree Grove	From Penheolferthyr West	From stub arm	From Penheolferthyr East
AM Peak: TA	45%	0%	55%
AM Peak: Observed	38%	0%	62%
PM Peak: TA	44%	0%	56%
PM Peak: Observed	14%	0%	86%

The AM peak distribution is within 10% of observed at the roundabout and is therefore acceptable. The PM peak distribution is significantly different, by 22% and 30% and therefore requires review.

The trip rates have been reviewed using TEMPRO 7.2 and the geographical area of W02000287. The TA states that these figures have been locally adjusted NTM growth factors. However, the figures used have not been factored by NTM. Using the NTM AF15 dataset and urban minor road type results in greater growth rates:

Year	AM Peak		PM Peak	
	TA	Audit	TA	Audit
2019-2022	1.0271	1.0336	1.0253	1.0331
2019-2027	1.0575	1.0787	1.057	1.0775
2019-2032	1.0864	1.1239	1.0868	1.1225

Traffic surveys are stated to have taken place at adjacent junctions in 2019. No details of the date of the surveys are provided and the surveys themselves are not included so that the traffic flow diagrams can be verified. Copies of the actual surveys are required. Were automatic traffic counts undertaken at the same time as the junctions counts to prove the surveys were undertaken on a day of typical flow? No survey data and associated analysis on a Saturday has been undertaken at the Twynyrodyn Road/Court Street/Tramroadside N/Tesco Roundabout, where the impact of retail trips is significant.

The HGV figures within the analysis cannot be verified as the count data has not been provided.

The following junctions are shown to be within capacity and have queues of 1 vehicle or less in 2032, with and without development. Existing queue data should be provided to confirm this minimal queuing:

- Junction 2 - Gilfach Cynon/Wallhead Road/Penheolferthyr Roundabout
- Junction 3 – Penheolferthyr/Elm Tree Grove Roundabout
- Junction 5 - Goat Mill Road/A4102/A4060/Bogey Road Roundabout

The approach and entry width on Bogey Road are incorrect. The entry width on the A4102 is incorrect. The approach and entry width on the A4060 (south) approach are over generous.

- Junction 7 - Bro Dawel/Plymouth Street priority junction

The following junction is shown to be at capacity in 2032, with and without development:

- Junction 1 - Twynyrodyn Road/Court Street/Tramroadside N/Tesco Roundabout

Queues in 2019 at the Twynyrodyn Road/Court Street/Tramroadside N/Tesco Roundabout are either 1 or less than one on all approaches in both peaks, with the exception of Twynyrodyn Road in the AM period (4 vehicles). These are less than have been observed on previous site visits.

The approach and entry width geometry are overly generous. Tramroadside N has an approach half width of 7.14m which is incorrect.

The arm that is at capacity in 2032 is Twynyrodyn Road in the AM peak. The largest increase in traffic flows at this junction due to the proposed development will be on this arm in this time period. Therefore, any increase in traffic generation may have a potentially significant impact at this junction.

The following junctions are shown to be over capacity in 2032, with and without development:

- Junction 4 – Penheolferthyr/A4102 Goat Mill Road priority junction

The junction is shown to be at capacity in 2019 and overcapacity in 2022, with development traffic increasing queues and delays. No improvements are proposed due to potential rerouting to avoid delays, the introduction of a residential travel plan to reduce the impact of the site and that drivers turning left at this junction from the site are likely travelling to an area within easy cycling distance and therefore have a modal choice.

However, both queues and delays increase at this overcapacity junction due to the development and therefore, improvements to mitigate the impact of the site are required.

- Junction 6 - Lower High Street/High Street/A4102/A4054 Avenue De Clichy Roundabout

This junction is shown to be significantly overcapacity in the PM peak with all scenarios. No improvements are proposed as the impact of the development is stated to be relatively minor.

However, both queues and delays increase at this overcapacity junction due to the development and therefore, improvements to mitigate the impact of the site are required.

A staggered crossroads is proposed at the junction of Elm Tree Grove / Oak Tree Rise. A more detailed plan is required so that the junction can be reviewed.

No swept path analysis has been provided to show that refuse vehicles can be accommodated within the design.

Transport Implementation Strategy

The Transport Implementation Strategy summarises the measures suggested to be conditions of consent. In summary these are:

- A Travel Plan (including a Travel Plan Welcome Pack which will provide public transport information and within walk / cycle distances/times to local amenities and facilities);
- Secure cycle parking spaces (in accordance with the adopted parking standards);
- Pedestrian direction signs outside the site; and
- Provision of a network of pedestrian routes between the site and the surrounding network, including improvements to existing footpaths to the south of the site (including the link to Aneurin Crescent to the south-west)

Conclusion

The following issues require review and further information submitted so that a full audit can be undertaken. Until this data is provided, the Transport Assessment cannot be accepted as the traffic and transport implications of the development cannot be fully assessed.

The Active Travel (Wales) Act 2013 aims to make walking and cycling the preferred option for shorter journeys such as to and from a workplace or education establishment. However, there are no significant improvements for pedestrians and cyclists. As part of the proposed development, significant contributions towards active travel should be secured.

Improvements to walking and cycling outside of the red boundary are required. The feasibility of having safe, secure and direct linkage to public transport needs to be shown.

Traffic growth is incorrect and therefore analysis of the future impact should be repeated, based on observed turning proportions at the Penheolferthyr / Elm Tree Grove Roundabout and using local trip factors.

The traffic surveys undertaken should be submitted and confirmation of existing queue lengths is required to provide confidence in the modelling undertaken.

Appendix A: TRICS 7.7.1

Calculation Reference: AUDIT-504502-200710-0739

TRIP RATE CALCULATION SELECTION PARAMETERS:

Land Use : 03 - RESIDENTIAL
 Category : A - HOUSES PRIVATELY OWNED
 VEHICLES

Selected regions and areas:

02	SOUTH EAST	
	ES EAST SUSSEX	2 days
	EX ESSEX	1 days
	HC HAMPSHIRE	1 days
	HF HERTFORDSHIRE	1 days
	KC KENT	3 days
	SC SURREY	1 days
	WS WEST SUSSEX	5 days
03	SOUTH WEST	
	DV DEVON	2 days
04	EAST ANGLIA	
	NF NORFOLK	2 days
	SF SUFFOLK	1 days
05	EAST MIDLANDS	
	LE LEICESTERSHIRE	1 days
	NR NORTHAMPTONSHIRE	1 days
06	WEST MIDLANDS	
	SH SHROPSHIRE	1 days
	WM WEST MIDLANDS	1 days
07	YORKSHIRE & NORTH LINCOLNSHIRE	
	NE NORTH EAST LINCOLNSHIRE	1 days
	NY NORTH YORKSHIRE	2 days
	SY SOUTH YORKSHIRE	1 days
09	NORTH	
	CB CUMBRIA	1 days
	DH DURHAM	3 days
11	SCOTLAND	
	FA FALKIRK	1 days

This section displays the number of survey days per TRICS® sub-region in the selected set

Primary Filtering selection:

This data displays the chosen trip rate parameter and its selected range. Only sites that fall within the parameter range are included in the trip rate calculation.

Parameter: No of Dwellings
 Actual Range: 50 to 197 (units:)
 Range Selected by User: 50 to 200 (units:)

Parking Spaces Range: All Surveys Included

Parking Spaces per Dwelling Range: All Surveys Included

Bedrooms per Dwelling Range: All Surveys Included

Percentage of dwellings privately owned: All Surveys Included

Public Transport Provision:

Selection by: Include all surveys

Date Range: 01/01/12 to 19/11/19

This data displays the range of survey dates selected. Only surveys that were conducted within this date range are included in the trip rate calculation.

Selected survey days:

Monday	7 days
Tuesday	6 days
Wednesday	5 days
Thursday	9 days
Friday	4 days
Saturday	1 days

This data displays the number of selected surveys by day of the week.

Selected survey types:

Manual count	32 days
Directional ATC Count	0 days

This data displays the number of manual classified surveys and the number of unclassified ATC surveys, the total adding up to the overall number of surveys in the selected set. Manual surveys are undertaken using staff, whilst ATC surveys are undertaken using machines.

This data displays the number of surveys per main location category within the selected set. The main location categories consist of Free Standing, Edge of Town, Suburban Area, Neighbourhood Centre, Edge of Town Centre, Town Centre and Not Known.

Selected Location Sub Categories:

Residential Zone	28
Village	3
No Sub Category	1

This data displays the number of surveys per location sub-category within the selected set. The location sub-categories consist of Commercial Zone, Industrial Zone, Development Zone, Residential Zone, Retail Zone, Built-Up Zone, Village, Out of Town, High Street and No Sub Category.

Secondary Filtering selection:

Use Class:

C3	32 days
----	---------

This data displays the number of surveys per Use Class classification within the selected set. The Use Classes Order 2005 has been used for this purpose, which can be found within the Library module of TRICS®.

Population within 1 mile:

1,000 or Less	1 days
1,001 to 5,000	5 days
5,001 to 10,000	8 days
10,001 to 15,000	8 days
15,001 to 20,000	5 days
20,001 to 25,000	3 days
25,001 to 50,000	2 days

This data displays the number of selected surveys within stated 1-mile radii of population.

Population within 5 miles:

5,001 to 25,000	7 days
25,001 to 50,000	5 days
50,001 to 75,000	1 days
75,001 to 100,000	6 days
100,001 to 125,000	2 days
125,001 to 250,000	8 days
250,001 to 500,000	3 days

This data displays the number of selected surveys within stated 5-mile radii of population.

Car ownership within 5 miles:

0.6 to 1.0	6 days
1.1 to 1.5	24 days
1.6 to 2.0	2 days

This data displays the number of selected surveys within stated ranges of average cars owned per residential dwelling, within a radius of 5-miles of selected survey sites.

Travel Plan:

Yes	8 days
No	24 days

This data displays the number of surveys within the selected set that were undertaken at sites with Travel Plans in place, and the number of surveys that were undertaken at sites without Travel Plans.

PTAL Rating:

No PTAL Present	31 days
2 Poor	1 days

This data displays the number of selected surveys with PTAL Ratings.

Total Rates:			2.033			2.106			4.139

This section displays the trip rate results based on the selected set of surveys and the selected count type (shown just above the table). It is split by three main columns, representing arrivals trips, departures trips, and total trips (arrivals plus departures). Within each of these main columns are three sub-columns. These display the number of survey days where count data is included (per time period), the average value of the selected trip rate calculation parameter (per time period), and the trip rate result (per time period). Total trip rates (the sum of the column) are also displayed at the foot of the table.

To obtain a trip rate, the average (mean) trip rate parameter value (TRP) is first calculated for all selected survey days that have count data available for the stated time period. The average (mean) number of arrivals, departures or totals (whichever applies) is also calculated (COUNT) for all selected survey days that have count data available for the stated time period. Then, the average count is divided by the average trip rate parameter value, and multiplied by the stated calculation factor (shown just above the table and abbreviated here as FACT). So, the method is: $COUNT/TRP*FACT$. Trip rates are then rounded to 3 decimal places.

The survey data, graphs and all associated supporting information, contained within the TRICS Database are published by TRICS Consortium Limited ("the Company") and the Company claims copyright and database rights in this published work. Parameter summary

Trip rate parameter range selected: 50 - 197 (units:)
 Survey date range: 01/01/12 - 19/11/19
 Number of weekdays (Monday-Friday): 31
 Number of Saturdays: 1
 Number of Sundays: 0
 Surveys automatically removed from selection: 3
 Surveys manually removed from selection: 0

This section displays a quick summary of some of the data filtering selections made by the TRICS® user. The trip rate calculation parameter range of all selected surveys is displayed first, followed by the range of minimum and maximum survey dates selected by the user. Then, the total number of selected weekdays and weekend days in the selected set of surveys are shown. Finally, the number of survey days that have been manually removed from the selected set outside of the standard filtering procedure are displayed.

TRIP RATE CALCULATION SELECTION PARAMETERS:

Land Use : 03 - RESIDENTIAL
 Category : A - HOUSES PRIVATELY OWNED
 VEHICLES

Selected regions and areas:

02	SOUTH EAST	
	ES EAST SUSSEX	2 days
	EX ESSEX	1 days
	HC HAMPSHIRE	1 days
	HF HERTFORDSHIRE	1 days
	KC KENT	3 days
	SC SURREY	1 days
	WS WEST SUSSEX	5 days
03	SOUTH WEST	
	DV DEVON	2 days
04	EAST ANGLIA	
	NF NORFOLK	2 days
	SF SUFFOLK	1 days
05	EAST MIDLANDS	
	LE LEICESTERSHIRE	1 days
	NR NORTHAMPTONSHIRE	1 days
06	WEST MIDLANDS	
	SH SHROPSHIRE	1 days
	WM WEST MIDLANDS	1 days
07	YORKSHIRE & NORTH LINCOLNSHIRE

	SY SOUTH YORKSHIRE	1 days
09	NORTH	
	CB CUMBRIA	1 days
	DH DURHAM	3 days
11	SCOTLAND	
	FA FALKIRK	1 days

This section displays the number of survey days per TRICS® sub-region in the selected set

Primary Filtering selection:

This data displays the chosen trip rate parameter and its selected range. Only sites that fall within the parameter range are included in the trip rate calculation.

Parameter: No of Dwellings
 Actual Range: 50 to 197 (units:)
 Range Selected by User: 50 to 200 (units:)

Parking Spaces Range: All Surveys Included

Parking Spaces per Dwelling Range: All Surveys Included

Bedrooms per Dwelling Range: All Surveys Included

Percentage of dwellings privately owned: All Surveys Included

Public Transport Provision:

Selection by: Include all surveys

Date Range: 01/01/12 to 19/11/19

This data displays the range of survey dates selected. Only surveys that were conducted within this date range are included in the trip rate calculation.

Selected survey days:

Monday	7 days
Tuesday	6 days
Wednesday	5 days
Thursday	9 days
Friday	4 days
Saturday	1 days

This data displays the number of selected surveys by day of the week.

Selected survey types:

Manual count	32 days
Directional ATC Count	0 days

This data displays the number of manual classified surveys and the number of unclassified ATC surveys, the total adding up to the overall number of surveys in the selected set. Manual surveys are undertaken using staff, whilst ATC surveys are undertaken using machines.

This data displays the number of surveys per main location category within the selected set. The main location categories consist of Free Standing, Edge of Town, Suburban Area, Neighbourhood Centre, Edge of Town Centre, Town Centre and Not Known.

Selected Location Sub Categories:

Residential Zone	28
Village	3
No Sub Category	1

This data displays the number of surveys per location sub-category within the selected set. The location sub-categories consist of Commercial Zone, Industrial Zone, Development Zone, Residential Zone, Retail Zone, Built-Up Zone, Village, Out of Town, High Street and No Sub Category.

Secondary Filtering selection:

Use Class:

C3	32 days
----	---------

This data displays the number of surveys per Use Class classification within the selected set. The Use Classes Order 2005 has been used for this purpose, which can be found within the Library module of TRICS®.

Population within 1 mile:

1,000 or Less	1 days
1,001 to 5,000	5 days
5,001 to 10,000	8 days
10,001 to 15,000	8 days
15,001 to 20,000	5 days
20,001 to 25,000	3 days
25,001 to 50,000	2 days

This data displays the number of selected surveys within stated 1-mile radii of population.

Population within 5 miles:

5,001 to 25,000	7 days
25,001 to 50,000	5 days
50,001 to 75,000	1 days
75,001 to 100,000	6 days
100,001 to 125,000	2 days
125,001 to 250,000	8 days
250,001 to 500,000	3 days

This data displays the number of selected surveys within stated 5-mile radii of population.

Car ownership within 5 miles:

0.6 to 1.0	6 days
1.1 to 1.5	24 days
1.6 to 2.0	2 days

This data displays the number of selected surveys within stated ranges of average cars owned per residential dwelling, within a radius of 5-miles of selected survey sites.

Travel Plan:

Yes	8 days
No	24 days

This data displays the number of surveys within the selected set that were undertaken at sites with Travel Plans in place, and the number of surveys that were undertaken at sites without Travel Plans.

PTAL Rating:

No PTAL Present	31 days
2 Poor	1 days

This data displays the number of selected surveys with PTAL Ratings.

This section displays actual (not average) trip rates for each of the survey days in the selected set, and ranks them in order of relative trip rate intensity, for a given time period (or peak period irrespective of time) selected by the user. The count type and direction are both displayed just above the table, along with the rows within the table representing the 85th and 15th percentile trip rate figures (highlighted in bold within the table itself).

The table itself displays details of each individual survey, alongside arrivals, departures and totals trip rates, sorted by whichever of the three directional options has been chosen by the user. As with the preceding trip rate calculation results table, the trip rates shown are per the calculation factor (e.g. per 100m2 GFA, per employee, per hectare, etc). Note that if the peak period option has been selected (as opposed to a specific chosen time period), the peak period for each individual survey day in the table is also displayed.

TRIP RATE CALCULATION SELECTION PARAMETERS:

Land Use : 03 - RESIDENTIAL
 Category : A - HOUSES PRIVATELY OWNED
 VEHICLES

Selected regions and areas:

02	SOUTH EAST	
	ES EAST SUSSEX	2 days
	EX ESSEX	1 days
	HC HAMPSHIRE	1 days
	HF HERTFORDSHIRE	1 days
	KC KENT	3 days
	SC SURREY	1 days
	WS WEST SUSSEX	5 days
03	SOUTH WEST	
	DV DEVON	2 days
04	EAST ANGLIA	
	NF NORFOLK	2 days
	SF SUFFOLK	1 days
05	EAST MIDLANDS	
	LE LEICESTERSHIRE	1 days
	NR NORTHAMPTONSHIRE	1 days
06	WEST MIDLANDS	
	SH SHROPSHIRE	1 days
	WM WEST MIDLANDS	1 days
07	YORKSHIRE & NORTH LINCOLNSHIRE	
	NE NORTH EAST LINCOLNSHIRE	1 days
	NY NORTH YORKSHIRE	2 days
	SY SOUTH YORKSHIRE	1 days
09	NORTH	
	CB CUMBRIA	1 days
	DH DURHAM	3 days
11	SCOTLAND	
	FA FALKIRK	1 days

This section displays the number of survey days per TRICS® sub-region in the selected set

Primary Filtering selection:

This data displays the chosen trip rate parameter and its selected range. Only sites that fall within the parameter range are included in the trip rate calculation.

Parameter: No of Dwellings
 Actual Range: 50 to 197 (units:)
 Range Selected by User: 50 to 200 (units:)

Parking Spaces Range: All Surveys Included

Parking Spaces per Dwelling Range: All Surveys Included

Bedrooms per Dwelling Range: All Surveys Included

Percentage of dwellings privately owned: All Surveys Included

Public Transport Provision:

Selection by: Include all surveys

Date Range: 01/01/12 to 19/11/19

This data displays the range of survey dates selected. Only surveys that were conducted within this date range are included in the trip rate calculation.

Selected survey days:

Monday	7 days
Tuesday	6 days
Wednesday	5 days
Thursday	9 days
Friday	4 days
Saturday	1 days

This data displays the number of selected surveys by day of the week.

Selected survey types:

Manual count	32 days
Directional ATC Count	0 days

This data displays the number of manual classified surveys and the number of unclassified ATC surveys, the total adding up to the overall number of surveys in the selected set. Manual surveys are undertaken using staff, whilst ATC surveys are undertaken using machines.

This data displays the number of surveys per main location category within the selected set. The main location categories consist of Free Standing, Edge of Town, Suburban Area, Neighbourhood Centre, Edge of Town Centre, Town Centre and Not Known.

Selected Location Sub Categories:

Residential Zone	28
Village	3
No Sub Category	1

This data displays the number of surveys per location sub-category within the selected set. The location sub-categories consist of Commercial Zone, Industrial Zone, Development Zone, Residential Zone, Retail Zone, Built-Up Zone, Village, Out of Town, High Street and No Sub Category.

Secondary Filtering selection:

Use Class:

C3	32 days
----	---------

This data displays the number of surveys per Use Class classification within the selected set. The Use Classes Order 2005 has been used for this purpose, which can be found within the Library module of TRICS®.

Population within 1 mile:

1,000 or Less	1 days
1,001 to 5,000	5 days
5,001 to 10,000	8 days
10,001 to 15,000	8 days
15,001 to 20,000	5 days
20,001 to 25,000	3 days
25,001 to 50,000	2 days

This data displays the number of selected surveys within stated 1-mile radii of population.

Population within 5 miles:

5,001 to 25,000	7 days
25,001 to 50,000	5 days
50,001 to 75,000	1 days
75,001 to 100,000	6 days
100,001 to 125,000	2 days
125,001 to 250,000	8 days
250,001 to 500,000	3 days

This data displays the number of selected surveys within stated 5-mile radii of population.

Car ownership within 5 miles:

0.6 to 1.0	6 days
1.1 to 1.5	24 days
1.6 to 2.0	2 days

This data displays the number of selected surveys within stated ranges of average cars owned per residential dwelling, within a radius of 5-miles of selected survey sites.

Travel Plan:

Yes	8 days
No	24 days

This data displays the number of surveys within the selected set that were undertaken at sites with Travel Plans in place, and the number of surveys that were undertaken at sites without Travel Plans.

PTAL Rating:

No PTAL Present	31 days
2 Poor	1 days

This data displays the number of selected surveys with PTAL Ratings.

This section displays actual (not average) trip rates for each of the survey days in the selected set, and ranks them in order of relative trip rate intensity, for a given time period (or peak period irrespective of time) selected by the user. The count type and direction are both displayed just above the table, along with the rows within the table representing the 85th and 15th percentile trip rate figures (highlighted in bold within the table itself).

The table itself displays details of each individual survey, alongside arrivals, departures and totals trip rates, sorted by whichever of the three directional options has been chosen by the user. As with the preceding trip rate calculation results table, the trip rates shown are per the calculation factor (e.g. per 100m2 GFA, per employee, per hectare, etc). Note that if the peak period option has been selected (as opposed to a specific chosen time period), the peak period for each individual survey day in the table is also displayed.

This section displays the number of survey days per TRICS® sub-region in the selected set

Primary Filtering selection:

This data displays the chosen trip rate parameter and its selected range. Only sites that fall within the parameter range are included in the trip rate calculation.

Parameter: No of Dwellings
 Actual Range: 50 to 197 (units:)
 Range Selected by User: 50 to 200 (units:)

Parking Spaces Range: All Surveys Included

Parking Spaces per Dwelling Range: All Surveys Included

Bedrooms per Dwelling Range: All Surveys Included

Percentage of dwellings privately owned: All Surveys Included

Public Transport Provision:

Selection by: Include all surveys

Date Range: 01/01/12 to 19/11/19

This data displays the range of survey dates selected. Only surveys that were conducted within this date range are included in the trip rate calculation.

Selected survey days:

Monday	7 days
Tuesday	6 days
Wednesday	5 days
Thursday	9 days
Friday	4 days
Saturday	1 days

This data displays the number of selected surveys by day of the week.

Selected survey types:

Manual count	32 days
Directional ATC Count	0 days

This data displays the number of manual classified surveys and the number of unclassified ATC surveys, the total adding up to the overall number of surveys in the selected set. Manual surveys are undertaken using staff, whilst ATC surveys are undertaken using machines.

This data displays the number of surveys per main location category within the selected set. The main location categories consist of Free Standing, Edge of Town, Suburban Area, Neighbourhood Centre, Edge of Town Centre, Town Centre and Not Known.

Selected Location Sub Categories:

Residential Zone	28
Village	3
No Sub Category	1

This data displays the number of surveys per location sub-category within the selected set. The location sub-categories consist of Commercial Zone, Industrial Zone, Development Zone, Residential Zone, Retail Zone, Built-Up Zone, Village, Out of Town, High Street and No Sub Category.

Secondary Filtering selection:

Use Class:

C3	32 days
----	---------

This data displays the number of surveys per Use Class classification within the selected set. The Use Classes Order 2005 has been used for this purpose, which can be found within the Library module of TRICS®.

Population within 1 mile:

1,000 or Less	1 days
1,001 to 5,000	5 days
5,001 to 10,000	8 days
10,001 to 15,000	8 days
15,001 to 20,000	5 days
20,001 to 25,000	3 days
25,001 to 50,000	2 days

This data displays the number of selected surveys within stated 1-mile radii of population.

Population within 5 miles:

5,001 to 25,000	7 days
25,001 to 50,000	5 days
50,001 to 75,000	1 days
75,001 to 100,000	6 days
100,001 to 125,000	2 days
125,001 to 250,000	8 days
250,001 to 500,000	3 days

This data displays the number of selected surveys within stated 5-mile radii of population.

Car ownership within 5 miles:

0.6 to 1.0	6 days
1.1 to 1.5	24 days
1.6 to 2.0	2 days

This data displays the number of selected surveys within stated ranges of average cars owned per residential dwelling, within a radius of 5-miles of selected survey sites.

Travel Plan:

Yes	8 days
No	24 days

This data displays the number of surveys within the selected set that were undertaken at sites with Travel Plans in place, and the number of surveys that were undertaken at sites without Travel Plans.

PTAL Rating:

No PTAL Present	31 days
2 Poor	1 days

This data displays the number of selected surveys with PTAL Ratings.

This section displays actual (not average) trip rates for each of the survey days in the selected set, and ranks them in order of relative trip rate intensity, for a given time period (or peak period irrespective of time) selected by the user. The count type and direction are both displayed just above the table, along with the rows within the table representing the 85th and 15th percentile trip rate figures (highlighted in bold within the table itself).

The table itself displays details of each individual survey, alongside arrivals, departures and totals trip rates, sorted by whichever of the three directional options has been chosen by the user. As with the preceding trip rate calculation results table, the trip rates shown are per the calculation factor (e.g. per 100m2 GFA, per employee, per hectare, etc). Note that if the peak period option has been selected (as opposed to a specific chosen time period), the peak period for each individual survey day in the table is also displayed.

TRIP RATE CALCULATION SELECTION PARAMETERS:

Land Use : 03 - RESIDENTIAL
 Category : A - HOUSES PRIVATELY OWNED
 VEHICLES

Selected regions and areas:

02	SOUTH EAST	
	ES EAST SUSSEX	2 days

This section displays the number of survey days per TRICS® sub-region in the selected set

Primary Filtering selection:

This data displays the chosen trip rate parameter and its selected range. Only sites that fall within the parameter range are included in the trip rate calculation.

Parameter: No of Dwellings
 Actual Range: 50 to 197 (units:)
 Range Selected by User: 50 to 200 (units:)

Parking Spaces Range: All Surveys Included

Parking Spaces per Dwelling Range: All Surveys Included

Bedrooms per Dwelling Range: All Surveys Included

Percentage of dwellings privately owned: All Surveys Included

Public Transport Provision:

Selection by: Include all surveys

Date Range: 01/01/12 to 19/11/19

This data displays the range of survey dates selected. Only surveys that were conducted within this date range are included in the trip rate calculation.

Selected survey days:

Monday	7 days
Tuesday	6 days
Wednesday	5 days
Thursday	9 days
Friday	4 days
Saturday	1 days

This data displays the number of selected surveys by day of the week.

Selected survey types:

Manual count	32 days
Directional ATC Count	0 days

This data displays the number of manual classified surveys and the number of unclassified ATC surveys, the total adding up to the overall number of surveys in the selected set. Manual surveys are undertaken using staff, whilst ATC surveys are undertaken using machines.

This data displays the number of surveys per main location category within the selected set. The main location categories consist of Free Standing, Edge of Town, Suburban Area, Neighbourhood Centre, Edge of Town Centre, Town Centre and Not Known.

Selected Location Sub Categories:

Residential Zone	28
Village	3
No Sub Category	1

This data displays the number of surveys per location sub-category within the selected set. The location sub-categories consist of Commercial Zone, Industrial Zone, Development Zone, Residential Zone, Retail Zone, Built-Up Zone, Village, Out of Town, High Street and No Sub Category.

Secondary Filtering selection:

Use Class:

C3	32 days
----	---------

This data displays the number of surveys per Use Class classification within the selected set. The Use Classes Order 2005 has been used for this purpose, which can be found within the Library module of TRICS®.

Population within 1 mile:

1,000 or Less	1 days
1,001 to 5,000	5 days
5,001 to 10,000	8 days
10,001 to 15,000	8 days
15,001 to 20,000	5 days
20,001 to 25,000	3 days
25,001 to 50,000	2 days

This data displays the number of selected surveys within stated 1-mile radii of population.

Population within 5 miles:

5,001 to 25,000	7 days
25,001 to 50,000	5 days
50,001 to 75,000	1 days
75,001 to 100,000	6 days
100,001 to 125,000	2 days
125,001 to 250,000	8 days
250,001 to 500,000	3 days

This data displays the number of selected surveys within stated 5-mile radii of population.

Car ownership within 5 miles:

0.6 to 1.0	6 days
1.1 to 1.5	24 days
1.6 to 2.0	2 days

This data displays the number of selected surveys within stated ranges of average cars owned per residential dwelling, within a radius of 5-miles of selected survey sites.

Travel Plan:

Yes	8 days
No	24 days

This data displays the number of surveys within the selected set that were undertaken at sites with Travel Plans in place, and the number of surveys that were undertaken at sites without Travel Plans.

PTAL Rating:

No PTAL Present	31 days
2 Poor	1 days

This data displays the number of selected surveys with PTAL Ratings.

This section provides a list of all survey sites and days in the selected set. For each individual survey site, it displays a unique site reference code and site address, the selected trip rate calculation parameter and its value, the day of the week and date of each survey, and whether the survey was a manual classified count or an ATC count.

This section displays actual (not average) trip rates for each of the survey days in the selected set, and ranks them in order of relative trip rate intensity, for a given time period (or peak period irrespective of time) selected by the user. The count type and direction are both displayed just above the table, along with the rows within the table representing the 85th and 15th percentile trip rate figures (highlighted in bold within the table itself).

The table itself displays details of each individual survey, alongside arrivals, departures and totals trip rates, sorted by whichever of the three directional options has been chosen by the user. As with the preceding trip rate calculation results table, the trip rates shown are per the calculation factor (e.g. per 100m2 GFA, per employee, per hectare, etc). Note that if the peak period option has been selected (as opposed to a specific chosen time period), the peak period for each individual survey day in the table is also displayed.

Appendix B

Survey Overview

Job Number/Job Name	SS195 Merthyr Tydfil
Date	Wednesday 26 February 2020
Time	0700-1900
Survey Type	Classified Junction Count
Weather Conditions	Sunny

Comments

Appendix D

TRIP RATE CALCULATION SELECTION PARAMETERS:

Land Use : 03 - RESIDENTIAL
 Category : A - HOUSES PRIVATELY OWNED
 MULTI-MODAL VEHICLES

Selected regions and areas:

02	SOUTH EAST	
	ES EAST SUSSEX	1 days
	HC HAMPSHIRE	1 days
	HF HERTFORDSHIRE	1 days
03	SOUTH WEST	
	DV DEVON	2 days
04	EAST ANGLIA	
	NF NORFOLK	3 days
06	WEST MIDLANDS	
	SH SHROPSHIRE	1 days
07	YORKSHIRE & NORTH LINCOLNSHIRE	
	NY NORTH YORKSHIRE	1 days
10	WALES	
	PS POWYS	1 days
17	ULSTER (NORTHERN IRELAND)	
	AN ANTRIM	1 days
	TY TYRONE	1 days

This section displays the number of survey days per TRICS® sub-region in the selected set

Primary Filtering selection:

This data displays the chosen trip rate parameter and its selected range. Only sites that fall within the parameter range are included in the trip rate calculation.

Parameter: No of Dwellings
 Actual Range: 10 to 160 (units:)
 Range Selected by User: 6 to 1817 (units:)

Parking Spaces Range: All Surveys Included

Parking Spaces per Dwelling Range: All Surveys Included

Bedrooms per Dwelling Range: All Surveys Included

Percentage of dwellings privately owned: All Surveys Included

Public Transport Provision:

Selection by: Include all surveys

Date Range: 01/01/12 to 19/11/19

This data displays the range of survey dates selected. Only surveys that were conducted within this date range are included in the trip rate calculation.

Selected survey days:

Monday	3 days
Tuesday	1 days
Wednesday	4 days
Thursday	3 days
Friday	2 days

This data displays the number of selected surveys by day of the week.

Selected survey types:

Manual count	13 days
Directional ATC Count	0 days

This data displays the number of manual classified surveys and the number of unclassified ATC surveys, the total adding up to the overall number of surveys in the selected set. Manual surveys are undertaken using staff, whilst ATC surveys are undertaken using machines.

Selected Locations:

Suburban Area (PPS6 Out of Centre)	4
Edge of Town	9

This data displays the number of surveys per main location category within the selected set. The main location categories consist of Free Standing, Edge of Town, Suburban Area, Neighbourhood Centre, Edge of Town Centre, Town Centre and Not Known.

Selected Location Sub Categories:

Industrial Zone	1
Residential Zone	11
No Sub Category	1

This data displays the number of surveys per location sub-category within the selected set. The location sub-categories consist of Commercial Zone, Industrial Zone, Development Zone, Residential Zone, Retail Zone, Built-Up Zone, Village, Out of Town, High Street and No Sub Category.

Secondary Filtering selection:

Use Class:

C3 13 days

This data displays the number of surveys per Use Class classification within the selected set. The Use Classes Order 2005 has been used for this purpose, which can be found within the Library module of TRICS®.

Population within 1 mile:

1,000 or Less	2 days
1,001 to 5,000	3 days
5,001 to 10,000	5 days
10,001 to 15,000	3 days

This data displays the number of selected surveys within stated 1-mile radii of population.

Population within 5 miles:

5,001 to 25,000	8 days
25,001 to 50,000	5 days

This data displays the number of selected surveys within stated 5-mile radii of population.

Car ownership within 5 miles:

0.6 to 1.0	1 days
1.1 to 1.5	9 days
1.6 to 2.0	3 days

This data displays the number of selected surveys within stated ranges of average cars owned per residential dwelling, within a radius of 5-miles of selected survey sites.

Travel Plan:

Yes	4 days
No	9 days

This data displays the number of surveys within the selected set that were undertaken at sites with Travel Plans in place, and the number of surveys that were undertaken at sites without Travel Plans.

PTAL Rating:

No PTAL Present	13 days
-----------------	---------

This data displays the number of selected surveys with PTAL Ratings.

LIST OF SITES relevant to selection parameters

This section displays actual (not average) trip rates for each of the survey days in the selected set, and ranks them in order of relative trip rate intensity, for a given time period (or peak period irrespective of time) selected by the user. The count type and direction are both displayed just above the table, along with the rows within the table representing the 85th and 15th percentile trip rate figures (highlighted in bold within the table itself).

The table itself displays details of each individual survey, alongside arrivals, departures and totals trip rates, sorted by whichever of the three directional options has been chosen by the user. As with the preceeding trip rate calculation results table, the trip rates shown are per the calculation factor (e.g. per 100m2 GFA, per employee, per hectare, etc). Note that if the peak period option has been selected (as opposed to a specific chosen time period), the peak period for each individual survey day in the table is also displayed.

This section displays actual (not average) trip rates for each of the survey days in the selected set, and ranks them in order of relative trip rate intensity, for a given time period (or peak period irrespective of time) selected by the user. The count type and direction are both displayed just above the table, along with the rows within the table representing the 85th and 15th percentile trip rate figures (highlighted in bold within the table itself).

The table itself displays details of each individual survey, alongside arrivals, departures and totals trip rates, sorted by whichever of the three directional options has been chosen by the user. As with the preceeding trip rate calculation results table, the trip rates shown are per the calculation factor (e.g. per 100m2 GFA, per employee, per hectare, etc). Note that if the peak period option has been selected (as opposed to a specific chosen time period), the peak period for each individual survey day in the table is also displayed.

This section displays actual (not average) trip rates for each of the survey days in the selected set, and ranks them in order of relative trip rate intensity, for a given time period (or peak period irrespective of time) selected by the user. The count type and direction are both displayed just above the table, along with the rows within the table representing the 85th and 15th percentile trip rate figures (highlighted in bold within the table itself).

The table itself displays details of each individual survey, alongside arrivals, departures and totals trip rates, sorted by whichever of the three directional options has been chosen by the user. As with the preceeding trip rate calculation results table, the trip rates shown are per the calculation factor (e.g. per 100m2 GFA, per employee, per hectare, etc). Note that if the peak period option has been selected (as opposed to a specific chosen time period), the peak period for each individual survey day in the table is also displayed.

Values shown are the highest values encountered over all time segments. Delay is the maximum value of average delay per arriving vehicle.
