A close-up photograph of a brick wall, showing the texture and color variations of the bricks and mortar. The bricks are in a running bond pattern, with colors ranging from light tan to dark brown.

Westerland slate has an appearance very close to that of natural slate. Its attractive riven surface and natural dressed edges make it an ideal solution for cost-conscious projects. The 500x243 Westerland is a superb product at a very cost-effective price point.

Graphite in colour.
