Proposed Decking Specifications

- **Overall Dimensions:** A square wooden deck measuring **4.8m x 4.8m**, providing a total surface area of **23.04m²**.
- **Safety Features:** A **1m high solid panel wooden fence** will be installed around the perimeter to ensure safety and privacy.
- **Elevation & Ground Clearance:**
 - The structure accounts for the natural slope of the garden, which falls away from the house.
 - **Minimum Clearance:** Adjacent to the neighbour's side, the deck sits approximately **300mm** above ground level.
 - **Maximum Clearance:** At the furthest point (4.8m from the house), the deck reaches a maximum height of **1000mm (1m)** above the existing ground.
- **Structural Support:** The deck is supported by a series of vertical timber posts of varying lengths to maintain a perfectly level surface across the varying garden gradient.
- **Boundary Context:** The depth of the decking runs parallel to the "Next door's extension" and "Next door's garden wall" as indicated in the top-down plan.
