

Proposed bat box for ecological enhancement measure
Min 5m from GF level- 300mm below ridge of south elevation- highlighted on image above.
Example proposed- Schwegler 1FF- suitable for crevice dwellers, such as Nathusius’ Pipistrelle (Pipistrellus nathusii), Daubenton’s Bat (Myotis daubetonii) and Common Pipistrelle (Pipistrellus pipistrellus).

NOTE: The East elevation is unchanged- addition of the bat box as part of the ecological enhancement measure to unsurveyed south elevation.
