Consultation reply date expired:

APPLICATION DETAILS & PLANNING HISTORY

This is an application for a non-material amendment to an existing planning permission for the construction of a single storey extension to provide a child care facility at the back wall of the school. The original application was approved under application P/20/0221.

The current proposed amendment seeks to alter the south-east elevation of the existing extension at the rear of the school by changing a window to a doorway and providing an accessible access ramp (with 1m high galvanised handrails) from this new entrance. It also seeks permission to conceal existing brick quoins and provide coloured cladding panels to the left and right hand side of the two doorways along this elevation.

The existing planning permission has not been the subject of a previous application for a non-material amendment.

SITE APPRAISAL

A full site appraisal was carried out at the time the existing planning permission was determined and it is considered that there are no changes that are relevant to the proposed amendment.

PUBLICITY & CONSULTATION

This is an application under Section 96a of the Town and Country Planning Act 1990 and the existing provisions relating to statutory consultation and publicity for planning applications do not therefore apply.

Welsh Government guidance on such applications, is that it is not expected that consultation or publicity will be necessary in the majority of cases.

POLICY CONTEXT

The Local Development Plan and national planning policies identified during the consideration of the existing planning permission remain relevant in the assessment and determination of this non-material amendment application.

Welsh Government Planning Guidance: Approving Non-material Amendments to an Existing Planning Permission (July 2014)

The guidance advises that a non-material amendment will depend on factors such as the context of the overall scheme, the amendments being sought to the original planning permission, the specific circumstances of the site and the surrounding area, which will vary from one application to another.

In deciding whether or not a proposed change is non-material, consideration should be given to the effect of the change, together with any previous changes made to the original planning permission. The guidance also identifies four tests, which local planning authorities may wish to consider when assessing and determining whether a proposed change would qualify as a non-material amendment. These four tests have been used in the determination of this application, as set out below.

REASONS FOR REACHING THE RECOMMENDATION

Section 96a of the Town and Country Planning Act 1990 provides the mechanism to approve non-material amendments to an existing planning permission.

Main Issues:

The main issue in determining this application is whether or not the proposed changes would constitute a non-material amendment to the development approved under application reference P/20/0221.

In this instance, the proposal to change an existing window to a doorway and provide an accessible access ramp would not materially alter the nature of the scheme nor would the changes prejudice the interests of any third party or body. Also, given that the works relates to a single storey extension at the back of the school, the provision of coloured panels to the doorways in the south eastern façade would have a limited impact on the overall nature of the scheme. Most importantly, the overall layout of the development would remain unchanged.

Accordingly, it is considered that the scale and nature of the proposed changes would not be great enough to cause an impact different to that caused by the approval approved scheme. Also, given the nature of the amendments being sought, it is not considered that the interests of any third party or body would be disadvantaged as a result of this proposal.

Other Considerations:

The following other considerations have been taken into account in considering the application and in reaching the recommendation set out below.

1. Conditions on the existing permission

There are no conditions on the existing planning permission that would prevent the proposed change.

2. Previous Non-material Amendments

The existing planning permission has not been the subject of any previous applications for non-material amendments.

3. Previous Publicity / Consultation Responses

The existing planning permission was not the subject of any previous publicity / consultation responses that relate to the proposed changes.

Conclusion

Taking into account the assessment and any other considerations identified above, it has been concluded that the proposed development is considered acceptable as a non-material amendment to the existing planning permission.

RECOMMENDATION: BE APPROVED

RECOMMENDATION ENDORSED
