For the Attention of: Marlene Ferreira – Case Officer
Merthyr Tydfil County Borough Council

[By Email: planning@merthyr.gov.uk]

10 December 2020

Dear Marlene

PLANNING APPLICATION: P/20/0243

Construct a detached dwelling and a detached garage; land adjacent to Sunny Bank, Mount Pleasant, Heolgerrig, Merthyr Tydfil, CF48 1RT – FURTHER INFORMATION RECEIVED

Thank you for your consultation letter of 3 December 2020 seeking the views of the Coal Authority on the further information submitted in support of the above planning application.

The Coal Authority Response: Material Consideration

The application site falls within the defined Development High Risk Area.

The Coal Authority records indicate that within the application site and surrounding area there are coal mining features and hazards, which need to be considered in relation to the determination of this planning application, specifically both recorded and likely historic unrecorded coal workings at shallow depth.

The Coal Authority initially objected to this planning application in a letter to the LPA dated 26 October 2020. The objection was raised on the grounds that a Coal Mining Risk Assessment had not been submitted as part of the application.

Whilst the applicant then submitted some further coal mining information, the Coal Authority still did not consider that it adequately addressed the impact of coal mining legacy on the proposed development.

The Coal Authority is therefore pleased to note that appropriate and up-to-date coal mining information for the proposed development site has been obtained and has been used to

inform the Coal Mining Risk Assessment (17 November 2020, prepared by Blandford Consulting), which now accompanies this planning application.

The Coal Mining Risk Assessment correctly identifies that the application site has been subject to past coal mining activity. Consequently, the report makes appropriate recommendations for intrusive site investigation works prior to development in order to establish the exact situation regarding ground conditions and to enable appropriate remedial measures to be identified, if necessary.

Please note that Permission is required from the Coal Authority Permit and Licensing Team before undertaking any activity, such as ground investigation and ground works, which may disturb coal property.

The Coal Authority Recommendation to the LPA

The Coal Authority concurs with the recommendations of the Coal Mining Risk Assessment that coalmining legacy potentially poses a risk to the proposed development and that intrusive site investigation works should be undertaken prior to development in order to establish the exact situation regarding coal mining legacy issues on the site.

Accordingly, the Coal Authority recommends the imposition of the following conditions:

1. *No development shall commence until;*
 - a) *a scheme of intrusive investigations has been carried out on site to establish the risks posed to the development by past coal mining activity, and;*
 - b) *any remediation works and/or mitigation measures to address land instability arising from coal mining legacy, as may be necessary, have been implemented on site in full in order to ensure that the site is safe and stable for the development proposed.*

The intrusive site investigations and remedial works shall be carried out in accordance with authoritative UK guidance.
2. *Prior to the occupation of the development, or it being taken into beneficial use, a signed statement or declaration prepared by a suitably competent person confirming that the site is, or has been made, safe and stable for the approved development shall be submitted to the Local Planning Authority for approval in writing. This document shall confirm the methods and findings of the intrusive site investigations and the completion of any remedial works and/or mitigation necessary to address the risks posed by past coal mining activity.*

The Coal Authority therefore **withdraws its objection** to the proposed development **subject to the imposition of the conditions to secure the above.** *This is our recommendation for condition wording. Whilst we appreciate that you may wish to make some amendment to the choice of words, we would respectfully request that the specific parameters to be satisfied are not altered by any changes that may be made.*

Please do not hesitate to contact me if you would like to discuss this matter further.

Yours sincerely

Chris MacArthur

Planning Liaison Manager

General Information for the Applicant

Under the Coal Industry Act 1994 any intrusive activities, including initial site investigation boreholes, and/or any subsequent treatment of coal mine workings/coal mine entries for ground stability purposes require the prior written permission of The Coal Authority, since such activities can have serious public health and safety implications. Failure to obtain permission will result in trespass, with the potential for court action. In the event that you are proposing to undertake such work in the Forest of Dean local authority area our permission may not be required; it is recommended that you check with us prior to commencing any works. Application forms for Coal Authority permission and further guidance can be obtained from The Coal Authority's website at:

<https://www.gov.uk/get-a-permit-to-deal-with-a-coal-mine-on-your-property>

Disclaimer

The above consultation response is provided by The Coal Authority as a Statutory Consultee and is based upon the latest available data on the date of the response, and electronic consultation records held by The Coal Authority since 1 April 2013. The comments made are also based upon only the information provided to The Coal Authority by the Local Planning Authority and/or has been published on the Council's website for consultation purposes in relation to this specific planning application. The views and conclusions contained in this response may be subject to review and amendment by The Coal Authority if additional or new data/information (such as a revised Coal Mining Risk Assessment) is provided by the Local Planning Authority or the Applicant for consultation purposes.

In formulating this response The Coal Authority has taken full account of the professional conclusions reached by the competent person who has prepared the Coal Mining Risk Assessment or other similar report. In the event that any future claim for liability arises in relation to this development The Coal Authority will take full account of the views, conclusions and mitigation previously expressed by the professional advisers for this development in relation to ground conditions and the acceptability of development.
