Date: 01/07/2025
Our Ref: PLA0088122
Your Ref: P/25/0165

Dear Sir/Madam,

Grid Ref: SO054046 305740 204195

Site: Hoover Plc, Pentrebach Road, Merthyr Tydfil

Development: Demolition, ground reclamation and remediation and outline planning application with all matters reserved for the comprehensive redevelopment of the former Hoover site to create a new neighbourhood, including up to 441 new homes

We refer to your planning consultation relating to the above site, and we can provide the following comments in respect to the proposed development.

We have reviewed the information submitted as part of this application with particular focus on the Drainage Strategy and Flood Risk Statement ref 24358-R-601-Drainage Strategy-B. We note that the intention is to drain foul water to the public sewer to which we offer no objection in principle. We also note that surface water will be disposed of via existing connections to the River Taff and nearby culverted watercourse, whilst we are not the determining body to assess the suitability of this option, we welcome a sustainable approach to manage the surface water.

Therefore, if you are minded to grant planning permission we request that the following Conditions and Advisory Notes are included within any subsequent consent.

We would request that if you are minded to grant Planning Consent for the above development that the **Conditions and Advisory Notes** provided below are included within the consent to ensure no detriment to existing residents or the environment and to Dŵr Cymru Welsh Water's assets.

glas
Glas Cymru Cyfngedig

Welsh Water is owned by Glas Cymru – a 'not-for-profit' company.
Mae Dŵr Cymru yn eiddo i Glas Cymru – cwmni 'nid-er-elw'.

Nghymru rhif 2366777. Swyddfa gofrestredig: Heol Pentwyn
Nelson, Treharris, Morgannwg Ganol CF46 6LY.

Condition

Only foul water from the development site shall be allowed to discharge to the public sewerage system and this discharge shall be made at manhole reference number SO06030801 as indicated on the extract of the Sewerage Network Plan attached to this decision notice. Thereafter no land, surface or highway water shall communicate either directly or indirectly to the public sewerage system.

Reason: To prevent hydraulic overloading of the public sewerage system, to protect the health and safety of existing residents and ensure no pollution of or detriment to the environment.

Advisory Notes

The planning permission hereby granted does not extend any rights to carry out any works to the public sewerage or water supply systems without first having obtained the necessary permissions required by the Water industries Act 1991.

The applicant may need to apply to Dwr Cymru / Welsh Water for any connection to the public sewer under S106 of the Water industry Act 1991. If the connection to the public sewer network is either via a lateral drain (i.e. a drain which extends beyond the connecting property boundary) or via a new sewer (i.e. serves more than one property), it is now a mandatory requirement to first enter into a Section 104 Adoption Agreement (Water Industry Act 1991). The design of the sewers and lateral drains must also conform to the Welsh Ministers Standards for Gravity Foul Sewers and Lateral Drains, and conform with the publication "Sewers for Adoption"- 7th Edition. Further information can be obtained via the Developer Services pages of www.dwrcymru.com

The applicant is also advised that some public sewers and lateral drains may not be recorded on our maps of public sewers because they were originally privately owned and were transferred into public ownership by nature of the Water Industry (Schemes for Adoption of Private Sewers) Regulations 2011. Under the Water Industry Act 1991 Dwr Cymru Welsh Water has rights of access to its apparatus at all times.

Sewage Treatment

No problems are envisaged with the Waste Water Treatment Works for the treatment of domestic discharges from this site.

Water Supply

Capacity is currently available in the water supply system to accommodate the development. We reserve the right however to reassess our position as part of the formal application for the provision of new water mains under Section 41 and Section 51 of the Water Industry Act (1991) to ensure there is sufficient capacity available to serve the development without causing detriment to existing customers' supply as demands upon our water systems change continually.

The proposed development is crossed by a trunk/distribution watermain, the approximate position being shown on the attached plan. Dwr Cymru Welsh Water as Statutory Undertaker has statutory powers to access our apparatus at all times. I enclose our Conditions for Development near Watermain(s). It may be possible for this watermain to be diverted under Section 185 of the Water Industry Act 1991, the cost of which will be re-charged to the developer. The developer must consult Dwr Cymru Welsh Water before any development commences on site.

DCWW is not responsible for fire protection or for providing suitable fire flows.

Our response is based on the information provided by your application. Should the proposal alter during the course of the application process we kindly request that we are re-consulted and reserve the right to make new representation.

If you have any queries please contact the undersigned on 0800 917 2652 or via email at developer.services@dwrcymru.com

Please quote our reference number in all communications and correspondence.

Yours faithfully,

Matthew Lord
