Morning,

I have been up and walked this site this morning. The site is protected by TPO 14 which was established to shield 6 bells estate from the old tip where Trago is now located. The design and proposed layout of the site means that most trees are unaffected and this visual barrier stays mostly intact, with the only exception being trees G40 and G41. These are small trees of little arboricultural value but if removed alternative screening should be reinstated in the form of tree planting or a hedgerow.

Arboriculturally there are no objections, but the recommendations stated above. Most of the trees of significant value will not be affected by this development

Thanks
Andrew
