

### Tree Work Schedule

| No. | Species      | Works                                              | Category |
|-----|--------------|----------------------------------------------------|----------|
| G03 | Vernon       | Remove to achieve 5m construction access           | B2       |
| T08 | Cornus Oak   | Prune crown lift to achieve 3m construction access | A1       |
| T09 | Sycamore     | Prune to achieve 3m construction access            | B1       |
| T09 | Copper Beech | Full to ground level, grind stump                  | B1       |
| T10 | Copper Beech | Full to ground level, grind stump                  | C1       |

All tree work is to be undertaken in accordance with British Standard BS:3998:2010 Tree work - Recommendations.  
All airings are to be removed and the site is to be left as found.  
Care is to be taken of the ground around retained trees to make sure that it does not become compacted as a result of tree surgery operations. No equipment or vehicles such as timber trailers, tractors, excavators or cranes shall be parked or driven beneath the crowns of any retained trees, to prevent subsequent compaction and root death.

### Protective Fencing

To be erected prior to the commencement of all works on site, and retained in place throughout construction.  
**Default Specification:** To comprise either 2.4m wooden site hoarding or 2.3m high scaffolding framework comprising of vertical and horizontal framework, well braced to resist impacts, with uprights to be spaced at a maximum of 3.0m intervals and driven into the ground by a minimum of 600mm. On to this, standard anti-climb welded mesh panels are to be securely fixed to each other with at least two scaffold clamps and to the scaffold framework, with wire.  
**Secondary Specification:** To comprise of 2m tall welded mesh panels on rubber or concrete feet. Panels are to be joined together using a minimum of two anti-tamper couplers, installed so that they can only be removed from inside the fence. The panels should be supported on the inner side by stabilizer struts, which should be attached to a base plate and secured with ground pins.  
All weather notices should be erected at regular intervals on the weld mesh panels with words such as "Construction exclusion zone - Keep out".

### Tree Protection Area

## KEEP OUT

Do not move this fence

**TOWN & COUNTRY PLANNING ACT 1990**  
TREES ENDOWED WITH PROTECTED STATUS UNDER THE PLANNING CONDITIONS AND/OR ARE THE SUBJECT OF A TREE PRESERVATION ORDER.  
CONTRIBUTION OF A TREE PRESERVATION ORDER MAY LEAD TO CRIMINAL PROSECUTION.  
ANY ENCROACHMENT INTO THE PROTECTED AREA MUST BE WITH THE WRITTEN PERMISSION OF THE LOCAL PLANNING AUTHORITY.

### Trunk Protection

**Protective trunk Wrapping:**  
To be attached to the trunks of retained trees prior to the commencement of all works on site, and retained in place throughout construction. To comprise of a minimum of three wrappings of clean, dry hessian around the trunk from ground level up to 2.3m high and tied in place using steel. Once the hessian a minimum of three wrappings of chestnut paling and it to be held in place by 2.50mm mild steel galvanneal wire in three locations and fixed into place using heavy staples fixed into the chestnut paling.  
**Protective boarding:**  
To be erected prior to the commencement of all works on site, and retained in place throughout construction. To comprise of 2.4m wooden site hoarding constructed upon a timber frame work situated around the outside of the planting pit. When the timber frame is constructed around the tree trunk a minimum of 4 layers of clean dry hessian is to be wrapped around the trunk with a minimum of 100mm band.  
All weather notices should be erected at regular intervals on the weld mesh panels with words such as "Construction exclusion zone - Keep out".

### Ground protection

The existing hard surfacing within the RPAs of T01 - T05 and G02, as depicted on the Tree Protection Plan (Arbtech TPP 01) must be retained for the duration of the project. If this is removed, it shall be done so under direct arboricultural supervision and replaced with suitable ground protection, suitable of withstanding the likely loading for the site.  
New temporary ground protection should be capable of supporting any traffic entering or using the site without being distorted or causing compaction of underlying soil.  
**Note:** The ground protection might comprise one of the following:  
a) for pedestrian movements only, a single thickness of scaffold boards placed either on top of a driven scaffold frame, or to form a suspended walkway, or on top of a compression-resistant layer (e.g. 100mm depth of woodchip), laid onto a geotextile membrane;  
b) for pedestrian-operated plant up to a gross weight of 2t, proprietary inter-locked ground protection boards placed on top of a compression-resistant layer (e.g. 100mm depth of woodchip), laid onto a geotextile membrane;  
c) for shelled or tracked construction traffic exceeding 2t gross weight, an alternative system (e.g. proprietary system or pre-cast reinforced concrete slabs) to an engineering specification designed in conjunction with arboricultural advice, to accommodate the likely loading to which it will be subjected.  
For situations other than those described in a) or b), the ground boarding is to be designed by a suitably qualified person to an engineering specification in conjunction with arboricultural advice, to be able to support the expected loading to be placed upon it.  
In all cases, the objective of the ground boarding is to avoid compaction of the soil beneath, so that tree root function remains unimpaired.

### Arboricultural Supervision

The arboricultural consultant will be required to attend site to directly supervise all demolition and construction works that have to be undertaken within the root protection areas. This will include:  
1. Pre-commencement site meeting.  
2. Location of protective measures.  
3. Any demolition and/or excavations within or adjacent to RPAs, including foundations, hard surfacing or underground services (a non-exhaustive list).  
4. Arboricultural sign off and removal of protective measures.

### Arboricultural Method Statement

Please refer to Arbtech Consulting Ltd. Tree Schedule and Arboricultural Method Statement, for full details on all surveyed trees and how all aspects of the development may be implemented without detriment to retained trees.
